Traffic
Congestion

ATHENS

It is a common phenomenon in Athens. It is estimated that drivers take more than 3 times than the normal time they would need to reach their destination.

WHY?

1.Overcrowding and delays in means of transport

2.The price of petrol is a bit lower than it was some years ago so most people prefer to use their cars.

NOW

Smart solutions now:

Smart applications inform passengers of time of arrival of buses, trains and trolleys.

In the *FUTURE*

Smart solutions in the future:

1.More lines in the means of transport, sensors to programme frequent service especially during rush hour.

2. New buses, trains etc, repairs to the old ones.

3.Applications to patrol bus lanes so that other vehicles do not enter them

4.Extensions of the main highways

The renewal of the Athens city bus fleet

The long-awaited contest for the renewal of the Athens city bus fleet is finally underway. It concerns 1,000 vehicles and will be done in two phases. The renewal is absolutely necessary, as in the capital by 2023, 80% of the fleet will be over 20 years old.

THE END
