Our New Learning Innovative Network for Education

ONLINE

We also want to deal with the safety on the internet, negative consequences of online learning, free time activities or interests to get engaged when you feel too tired and overwhelmed from spending too much time on your computer, a variety of options on culture, heritage, sport, and other fields of interest for young people that you can find in digital form and that can be educational.

TOPICS

With this project the partners aim at developing and increasing their knowledge, skills and attitudes needed to be digitally competent through sharing godd practices, collaboration and interaction at European level.

Three topics addressed by the project:

-ICT - new technologies - digital competences
-Open and distance learning
-New innovative curricula/educational methods/development of training courses

Digital Competence was already essential but has proved even more. With the unprecedented challenges that forced to shut down schools all across Europe and the world, different connected ideas have motivated six schools to team up and create ONLINE, a student and teacher based two-year project addressing Digital Education Readiness.

TIMETABLE

There will be two transnational meetings, one at the beginning of the first year and another at the end of the second year. The first transnational meeting will serve as a means of preparing and coordinating in detail the work until the end of each project year to guarantee the best possible results, distributing tasks and preparing the promotional brochure, posters, videos, to make necessary adaptations, plan the time and deadlines, dissemination activities, evaluation and quality assessment, organize workshops and to develop the innovative teaching methods materials. The second transnational meeting will take place in order to evaluate the two years of the project, work on the e-book (final product) and discuss further dissemination and the sustainability of the project. Teacher training will also be a part of both transnational meetings.The coordinators will have to participate on these meetings, they will take place together with the first and the last learning, teaching, training meetings.

EXPECTED RESULTS

We are anticipating the following tangible results:
An e-book with all the didactic materials is the final product which can be used as a teaching or reference material by the partner schools in the future. The e-book will include the following products/outcomes/results/activities or the links of these products/outcomes/results/activities:
1 - A collection of didactic materials used during the project, the students in each country will prepare a brochure with the title " Digital tools used in online learning"
2 - A collection of videos containing the results of the activities. each school will upload them on their school's Youtube channel
3 - A collection of lesson plans prepared according to the innovative lesson plan model which elaborates on different forms of learning outcomes
4 - A collection of questionnaires and assessment / evaluation forms
5 - A project logo
6 - Promotional posters, brochures, videos made throughout the project's duration
7 - The project website
8 - The e-twinning project
9 - Students' blogs
10 - Online newspapers after each L/T/T activity/transnational meeting (HR)
11 - The analysis of the surveys which will be filled in by participating students after each mobility
12 - Webinars and online meetings

OBJECTIVES

The partnership aims to reach the following objectives:

- to equip teachers and students with skills and knowledge on the use of digital tools so that they are all encouraged and motivated to participate effectively and constructively in the lessons
- to increase their digital competence and strengthen teacher's skills based teaching practice through transnational cooperation and by adopting innovative, effective and new methods and tools
- to increase their level of foreign languages, boost their communication and social skills and collaboration/teamwork
- to use creativity and innovation, critical thinking, problem-solving and decision-making approaches
- to make most of exchange of good practices and peer-learning
- to take personal and social responsibility in unpredictable situation like pandemic of covid-19
- to boost their cultural awareness and intercultural learning
- to promote a sense of European dimension, create interest in other countries and tolerance towards different cultures.

The participants will gain knowledge of different perspectives of digital technologies and will have enriching personal encounters which will provide them with first-hand experiences of the skills required in in 'new normal' era.
