
How to grow beans in 10 steps?

Choose which variety of green bean to plant

Each will have different light, space, planting, not to mention a different flavor.

Decide on the number of plants you want

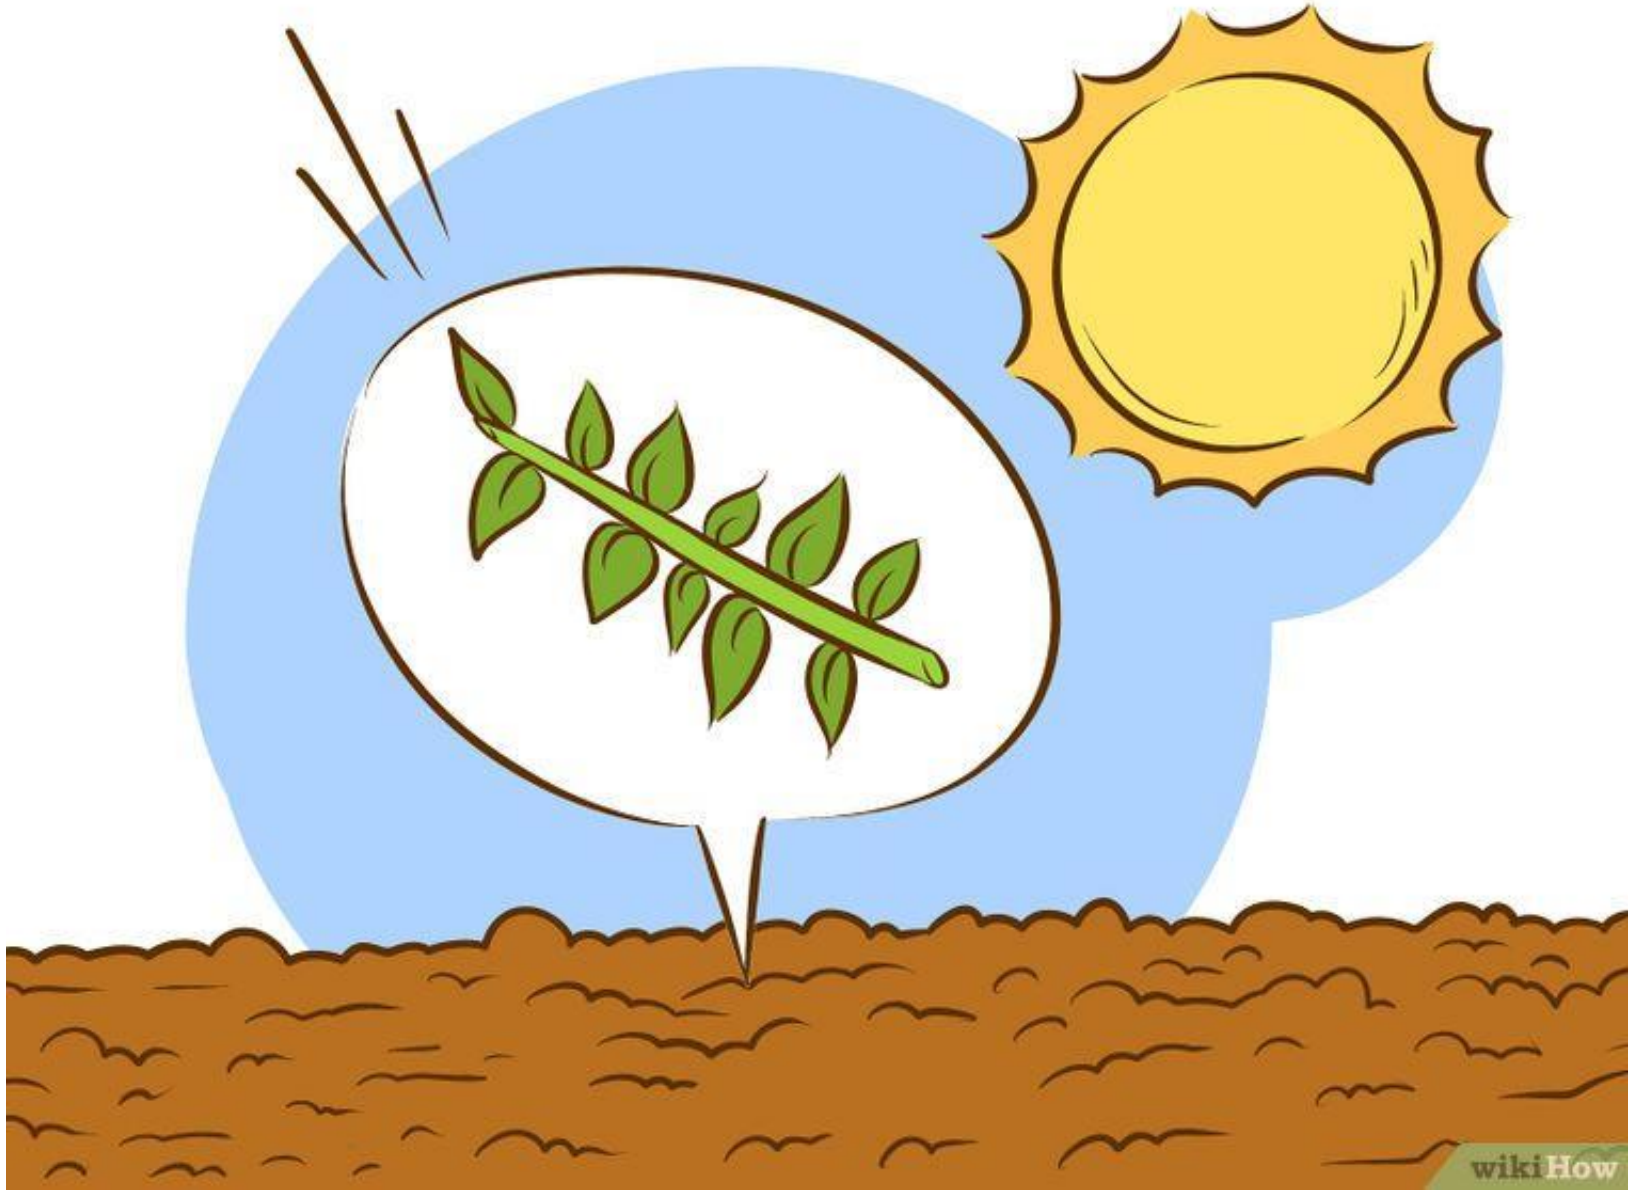
If you plan to plant rows, be sure to leave enough space between them for easy access – particularly if you’ve chosen a tall variety.

Pick the green beans during an immature stage

Store the green beans in a refrigerator

Keep green beans in an airtight container and store for about 4 to 7 days in your refrigerator.

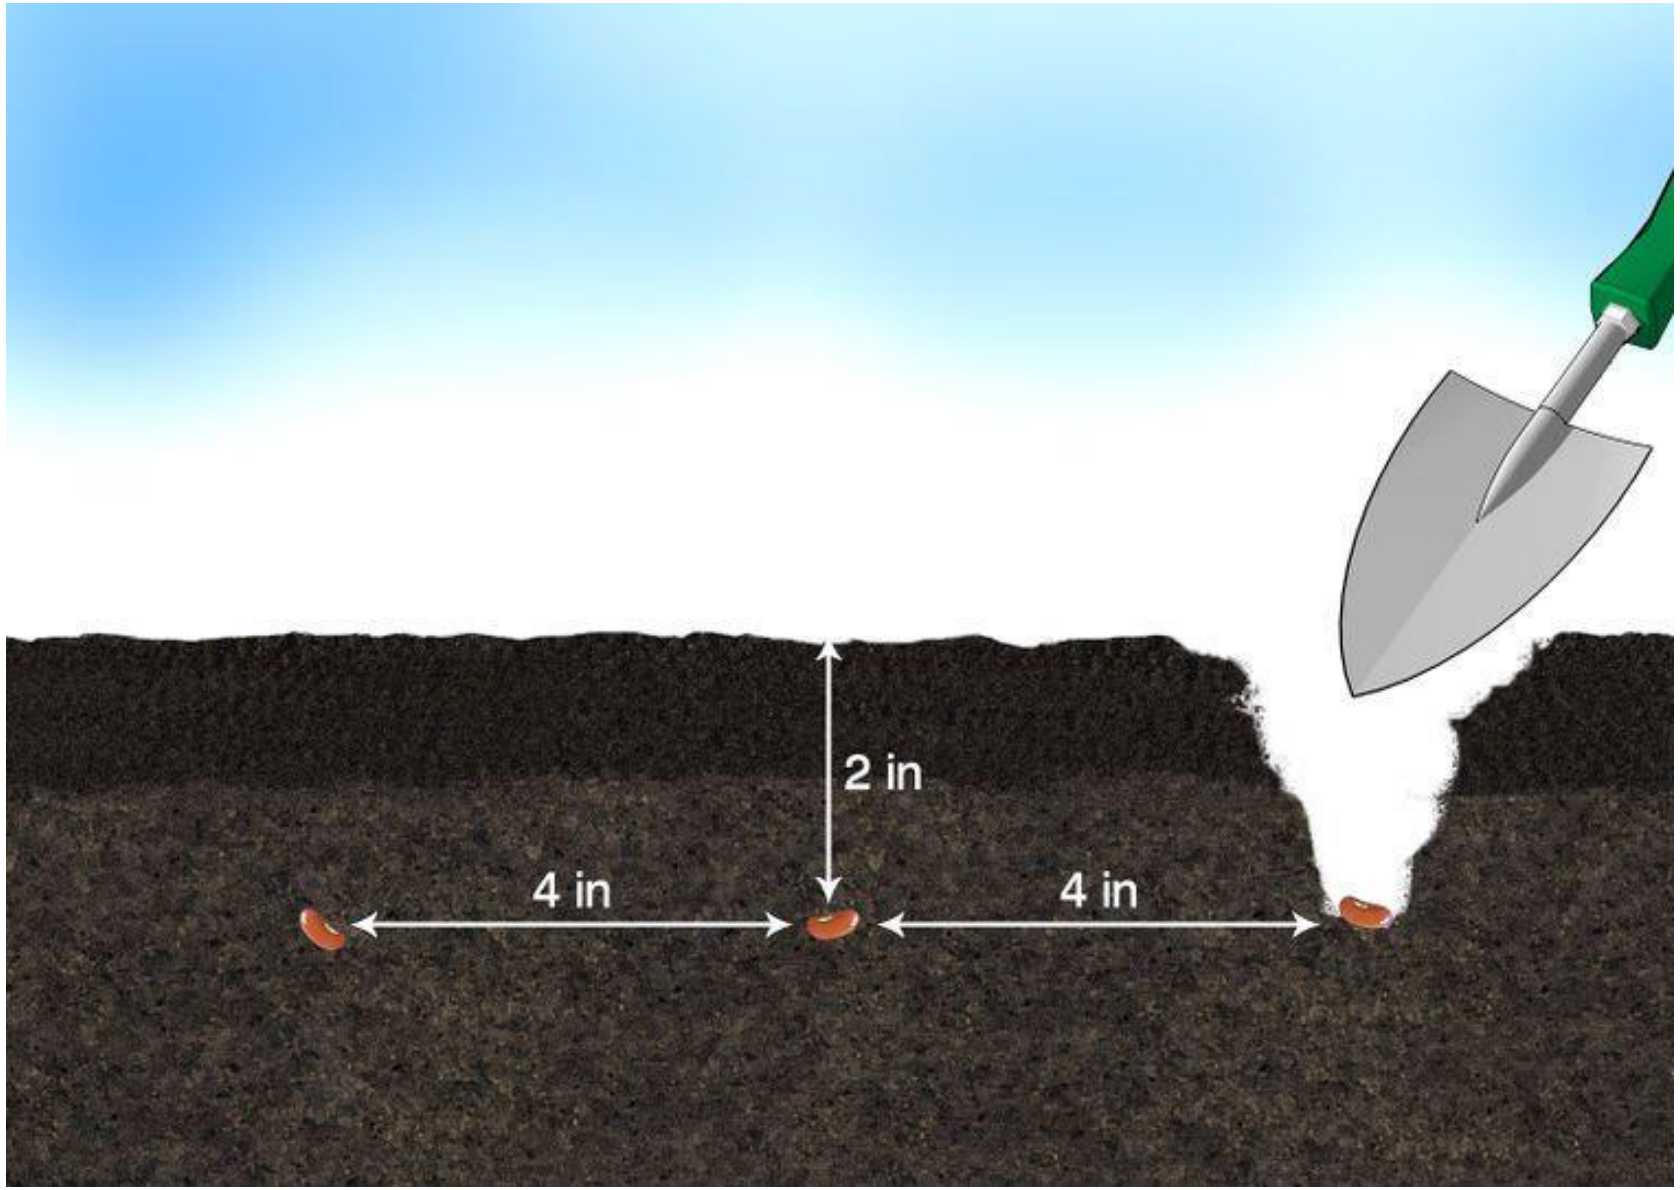
Plant beans in warm part of the year



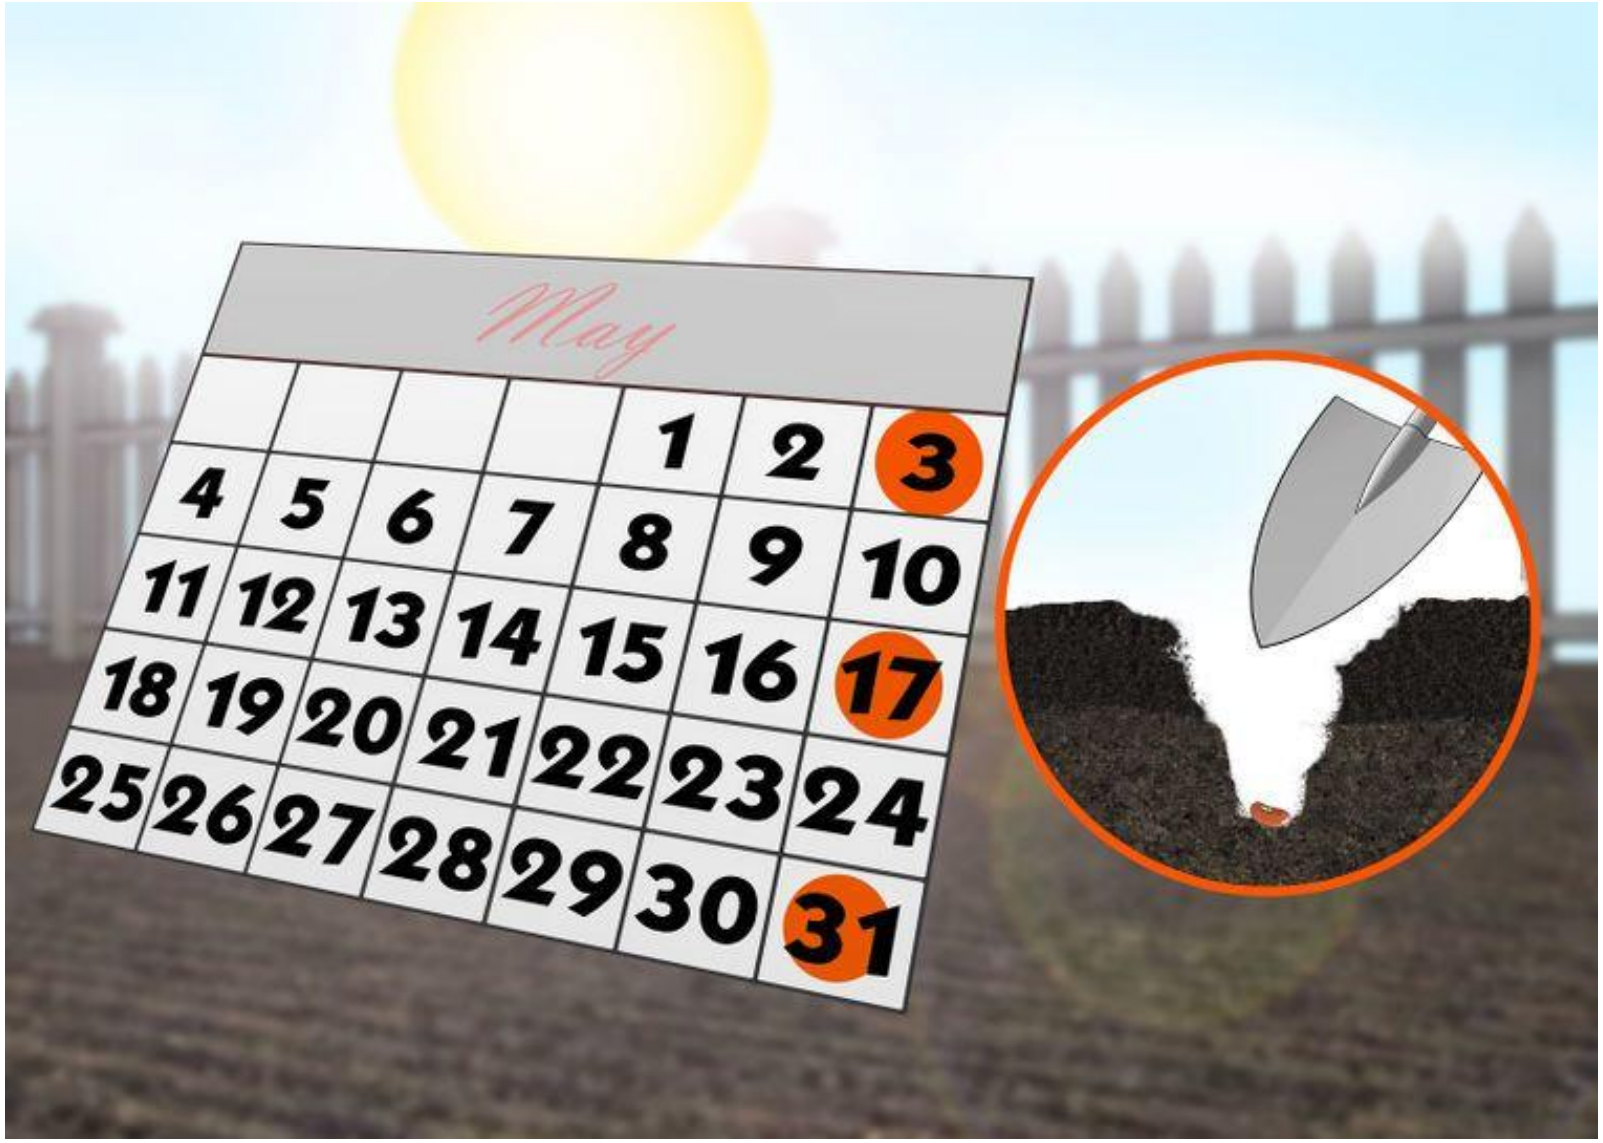
Pick a sunny spot for your crop

Prepare the soil

Plant each seed 2 to 5 cm deep



Sow additional seeds every two weeks



Water regularly

Remove weeds as needed
