The Erasmus Garden Project comes to its end
and these are our experiences and successes:

Final Presentation

- Five classes cultivate our vegetable beds.
- All children are allowed to harvest fruits and tomatoes.
- All children use the „garden of senses" and the playground during breaks.
- More and more parents become active partners for the garden.
- Family events took place regularly and will be carried on in future.
- Persons contact us and bring plants for the garden.

- We developed a pedagocial concept for the garden, finished it and introduced it to our colleagues.
- Colleagues open themselves slowly and show new interest and acceptance (as well for the garden as for Erasmus work).

- Public attention:
  There will be a social project of an insurance. People come and work in the garden for one day.

- It seems to be a possibility to get money from the provider of the school for building a green classroom, hammocks and other chilling furnitures.
