

My impressions from the visit of partner schools within the project F.A.C.E I.T

The visit was very interesting. I met a lot of people from abroad and from my school. The school days were well-organised and the trips were very interesting.

Monday

We began the first day with a festive opening ceremony. My schoolmates showed presentations and talked about our town. Next I went to the lessons with my guest. Later the IT classes took place. We were showed an interesting app development platform. That was the best. Afterwards, a policeman presented us the most important information about cybersecurity.

Tuesday

On Tuesday we went for a trip to the museum of Concentration Camp in Auschwitz and Birkenau. The weather was awful, it was rainy and cold. Quietly we followed the tour guide, who told us about the history of this place. Next we visited a local shopping centre to get something to eat.

Wednesday

On the third day we went on a trip to Wrocław, which is the Polish capital of culture. Firstly we visited the zoo, africanarium. We saw exotic animals like: stingrays, sharks, hippos, penguins and a lot of others. Next we went to „Hydropolis”. It is a knowledge centre of water. We were told there a lot of interesting information. The last attraction was the Christmas Market.

Thursday

On Thursday took place activities at school. At the beginning we had math classes, where we made solid figures from paper. Next we prepared questions for the quiz about our trips from previous days. Our next activity was IT classes. We were introduced with the e-Twinning platform for the members of project, which allows us to communicate. Then there were folk workshops and a farewell party

Friday

On Friday there was an official farewell ceremony of the guests from abroad and we were given diplomas. Afterwards we visited the local museum in Kluczbork, where we were shown an exhibition about beekeeping and amber. Our last activity was different lessons with our guests.

What have I learnt?

- I learnt using an app called „App Inventor Environment”
- I was told a history of the Concentration Camp in Auschwitz and Birkenau
- I was showed a lot of new animals species
- I learnt lots of things about water
- I learnt to make friends
- I was able to communicate with foreigners
- I overcame my language barrier

How have I raised my European awareness?

I have raised my European awareness. Taking part in this project I have learnt about the cultural diversity of other members of UE. Since then I have been more open to new cultures. This experience has helped to build more trust with foreigners.
