

*It's great to collaborate and learn on a joint project!*

*Two countries, three schools, a good experience!*

This is the feeling that has left the eTwinning to pupils and teachers of the three schools who worked in the school year 2014-2015. The students expressed their feelings and impressions after completing their work and this sense we want to testify as an epilogue of our creative journey.

During the E- Twinning work students felt that their opinion on the form how could be the ideal school really counts! It was a great experience! There were many different views on how it would be a great school. Students anxious effectively in fruitful dialogue and cooperation and hope that someday their desires for the school that they dream will take place.

Their E- Twinning program has enabled them to recognize the common goals that have pupils from different countries about the school of their dreams. Through the presentation of their ideas argue that they would like someday to implement them, although of course they succeed in raise awareness with the relevant education issues.

Due to the unexpectedly good cooperation, common desire of students was if there was a more direct communication, one meeting with students from other schools which have worked, mainly to exchange further views on the matter.

The etwinning is a special experience for the students, as they say. Through the program managed not only to express their views on the current educational system but also to compare it with the school they dream.

This is the magic of etwinning: was something new for students. An amazing experience that enables collaboration with schoolmates of the same school, but even better cooperation with other students from different schools within and outside of your country! That is why it is noticeable that all participating students would like to participate again!

Basic feature of the program, according to the opinion of students, it was been heard many opinions about how everyone dreams of his own school and this freedom to express their views was unique for several students. Unique experience was for school data such a broad collaboration between three schools. So common is their desire to create and time such a team to work on this project.

Through the e-twinning project educational community tasted many experiences. We could not believe from the beginning that it will be so creative parallel with many inspiring elements. It's nice to talk to new people about common things that directly concern and trying to find solutions, admit pupils themselves. Through the work they have been assigned felt responsible and able to contribute to changes.

"Finally a different school program!" Admit students with only positive results could call them. This cooperation is of course provided an opportunity to acquaint the students with the culture and civilization not only different countries but also different cities.

The etwinning is an incredible idea and a pleasant pastime for free time of students. Help students develop specific skills but understand the importance of effective collaboration between students and what really is mutual.

*As a farewell we as responsible teachers of the program we have to throw in that the cooperation projects between students and teachers is particularly acceptable by the entire educational community. Learning in this manner excites and causes interest. I wish this kind of action to become a tradition for the future modern school!*
