eTwinning improvement, Instagram, Blog

4. BLOG

*Revise the other document

5. INSTAGRAM

- Each country must have at least one profile linked to their corresponding schools which will support the project (It'd be great if each school has its own profile and we can support the project from there. Otherwise, personal profiles may retweet or share others' publications related to the project.
- **Edit information:** logo, description, link to the project's blog, use the same hashtags when we make entries/publications (easier to find all the information)

6. GATHERING INFORMATION FROM PREVIOUS MOBILITIES

- Reordering DRIVE
- For each mobility we need to have:
 - o **Preparatory activities** (for students and for teachers)
 - o **Activities during the mobilities** (shared activities and activities hold by the host country) We need to document all the process, so, please, check you have all the rights and permissions to use the materials.
 - o Meetings, work process, training and job shadowing (**schedule during the mobility**) **Suggestion: using a calendar we can get access to all the information from**
 - o **Agreements reached** during the mobility, assessment (of the process), any adaptation (??)
 - o **Activities after the mobility** (if any)

Erasmus Project LO-VE

Co-financiado por el programa Erasmus de la Unión Europea

REORDERING THE TWinspace

- E-SAFETY
- PERMISSIONS
- RESPONSIBILITIES (individual and shared)

0. TO START WITH

1. OUR PROJECT

- Objectives
- How it is integrated in our curriculum
