

Activity № 4 - Elements of Professional Driving of Motor Vehicle

Element I- Parking perpendicular to the sidewalk

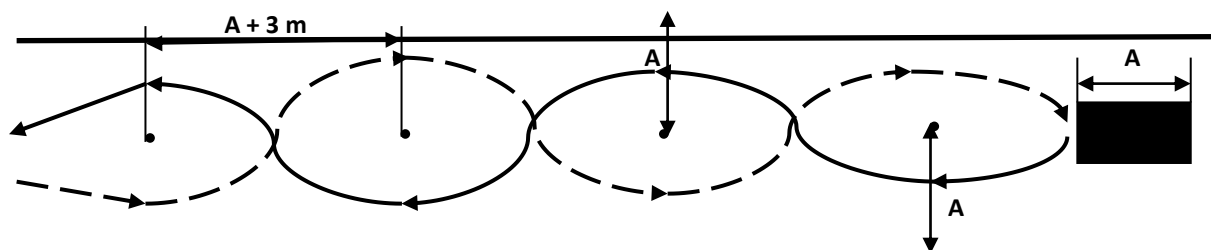

The car has to be parked from its starting position making one reverse motion as it is shown on the figure. When the vehicle is stationary its dimensions must be within the markings. The automobile should not touch the markers while entering (leaving) the parking place. Its wheels should not touch the markings, too.

Element II- Parking parallel to the sidewalk

The car has to be parked making one reverse motion. When the vehicle is stationary its dimensions have to be within the markings.

Element III- Moving in a curved line making a forward and a reverse motion

The automobile should move making a forward motion between the points and do it again but making a reverse motion.
