

Report Ecoweek youngest pupils 21st May to 8th June

ENERGY

Informative lessons

Wednesday May 23rd teachers of the youngest pupils taught their children about various types of energy. Interesting but difficult for such young pupils. But they listened fascinated and at the end there was a nice energizer!

Creative les

Tuesday June 5th we prepared the visit in the windmill. Every day they built a little part of the mill. They found out that wind (blowing) can make the wicks moving.

Bezoek aan de molen in Cuijk

And finally the visit... Pupils had a lot of questions and they enjoyed the visit very very much@!!
