

Creating Diorama

Our Diorama shows the kitchen and the dining room in a mansion of a factory owner while the family eats.

The diorama has two different styles, the dining room is high quality whereas the kitchen is very plain (schlicht) and simple. The dining room has a big table in the middle of the room on top of the table are delicious food for example the lobster (Hummer). At the wall, on the left side you can see a picture from a factory and on the right side you can see a very expensive picture from an artist.

To the left of the table you can see a little cup board and at the top of it are some flowers.

On the left side, next to the little cup board there is an oven and on the right side next to the little door you can see a little desk.

At the right side you can also see a plant.

The dining room is painted in a beautiful dark blue color and the floor is made of expensive wood. You can also see that there is a beautiful carpet on the floor.

The kitchen isn't painted the walls are only white and there is a counter (Ablage) almost on the entire left side. In front of the counter is an oven. Everywhere on the counter is exquisite food and in the bottom is a water tap.

The situation our diorama shows is everyday the family is having dinner. They only have to sit on their chairs and eat but their servants have to serve them. Because the family doesn't really want to see the servants there is only one person who brings the food to the table. The others lay the food down on the little desk next to the door.

The servants have to work every day verry hard so that the family is satisfied. But the factory owner also has some worries couse after all he has to manage an entire factory. But of course the factory family is much better off than the servants, which is clearly evident(ganz deutlich) in the design of the two rooms. Where the factory family is, it is expensive and nicely furnished(eingerichtet) and where the staff is, it is simple.

That was our Diorama.
