

Stop the change Save the planet
I.C. 2 Quartu/Italy

Save!!!

I think saving the planet is something that had to be done for a long time. Stop pollution had to be done for a long time but only now do we realize the serious damage we are doing to the environment and the seas, to animals and to ourselves.

Together with my classmates, we have made drawings that represent the Earth becoming weaker and weaker because of men and the pollution.

Through Etwinning we collaborate with classes from different countries. We are continuing this project with seriousness, and determination even during Covid 19. There are many classes within this project like the Turkish ones or the Portuguese.
