# Το ποντικάκι που ήθελε να αγγίξει ένα αστεράκι

Μαθηματικά: ΣΤΙΒΕΝ ΓΟΥΣΟΤ

A little mouse, called Troktikoulis, has got a big dream. He wants to touch a star. His grandfather tells him that this dream is difficult to come true. However, the mouse continues to chase his dream. One day, he sees something magical. Outside of the mouse hole, there is a Christmas tree with a star on its top. The mouse decides to climb up the tree and touch the star. He meets ornaments (a doll, a soldier and a sailor) and each one asks from the little mouse to follow them and forget about his dream. But the little mouse goes on and manages to touch the star on the top. As soon as he touches the star, he loses his balance and falls down. He runs to his grandfather and says the news. He goes out to see it again, but he can't see its light anymore, so he thinks that it must be in the sky. He goes out of the house to find it and then he realizes that there are many more stars in the sky. Then he wonders whether he can touch all the stars one day...
