Lake Bulbs

Due to the amaryllidaceae alkaloids (galanthamine, tazettin, lycoline) used in drug production for the treatment of Alzheimer's disease, lake bulbs are collected and exported from nature. Its annual export is approximately 4,000,000 pieces. If urgent measures are not taken, the lake bulbs will never disappear to return.

Snow Flower

16th century made from this plant breeding since been taken under protection in some countries such as Serbia and Hungary but unfortunately it was not taken any step in this regard in Turkey.
