

PRESENTATION ABOUT...

Alicja

NAMELY ABOUT ME!

# Hey there!

## Preface

This presentation involves information about... me. I haven't even expected such an opportunity. It participate in the Erasmus+ project.

## Short incroduction

My name is - as the tittle says - Ala. As I am writing about it now, in a few days I will end 13 years of my miserable life. I'm just an ordinary, average girl from Poland.

## WHO AM I?

### Person

Like you, he or she.

### Human

An advanced organism, that successfully destroys this planet.

### Wight

Only wanted to add some text.

## WHO AM I TRYING TO BE:

### Successive human being.

Confident, social, kind, empathy, always having something to say, but only doing it when necessary.

### Perfectionist

You can easily find out, how I'm doing with it.

### The perfect person

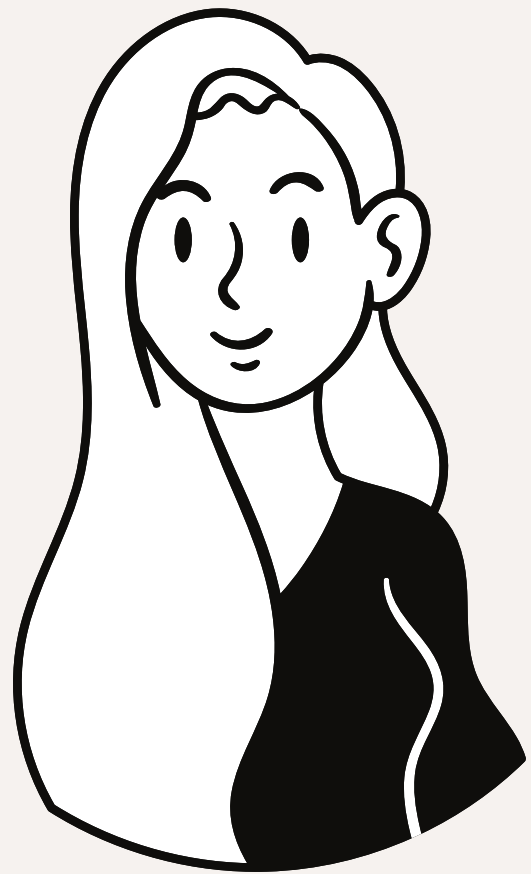

Just kidding. I hope to be someday perfect in people opinion, but it's unreal.

# Personality

This time without bad jokes.

I am unfortunately 'a bit' bipolar person. One time you would see me sad and completely devoid of any energy, sensitive, exhausted, other times - the opposite. I would be proud of myself, happy with my life, motivated and ambitious... It's hard to describe my character, when I jump all the time between the extrovert and the introvert. I'd be grateful if it ever ends.

# Appearance

I look... tamely.

It's me, OK? Don't ask, why I don't want to share my photo... Probably because I don't wanna hurt anybody.

I have straight, dark blonde hair, which ends below my hips. Yeah... A bit long.

I have blue eyes, because... Every member of my family has them. Simply genetics.

I am a little taller than most girls my age. It's just 170 cm height.

I used to wear sweatshirts everyday, but now it depends on my mood.

# Family

Dad, mother, brother, sister and dog - seems nice.

My family is big, when you would try to compare it to the contemporary family. I will be honest - we aren't a perfect family, we have our ups and downs. We aren't very close. But still I love them. My father, when he wishes to teach me something new, my mum, when she wants to listen to my complaints about the world, my brother, when he craves to play with me, even if he has a lot to do for his school (strange dependence, isn't it?), my sister, that spends with me every second of my life (greetings to twin sisters) and... my dog. He fawns and always tries to comfort me, when I feel bad. That's why I love them all.

# My interests

## Programming

Takes the first place, because I just love it - it's my passion since I was about... 6 years old? I always wondered how it is to write a code, and now, I can do it without obstacle.

## Exercising and stretching

I idolize stretching since half year and exercising for two years. I can do for now oversplit, nice wheel pose etc. but I want more, like forearm. I had an obsession about exercising. My goal is to have a six-pack.

## Learning

But only, if I am in good mood. Mostly it's learning new languages. I want to be a polyglot in the future and know 12 languages. That would be incredibly satisfying...

# Other hobbies

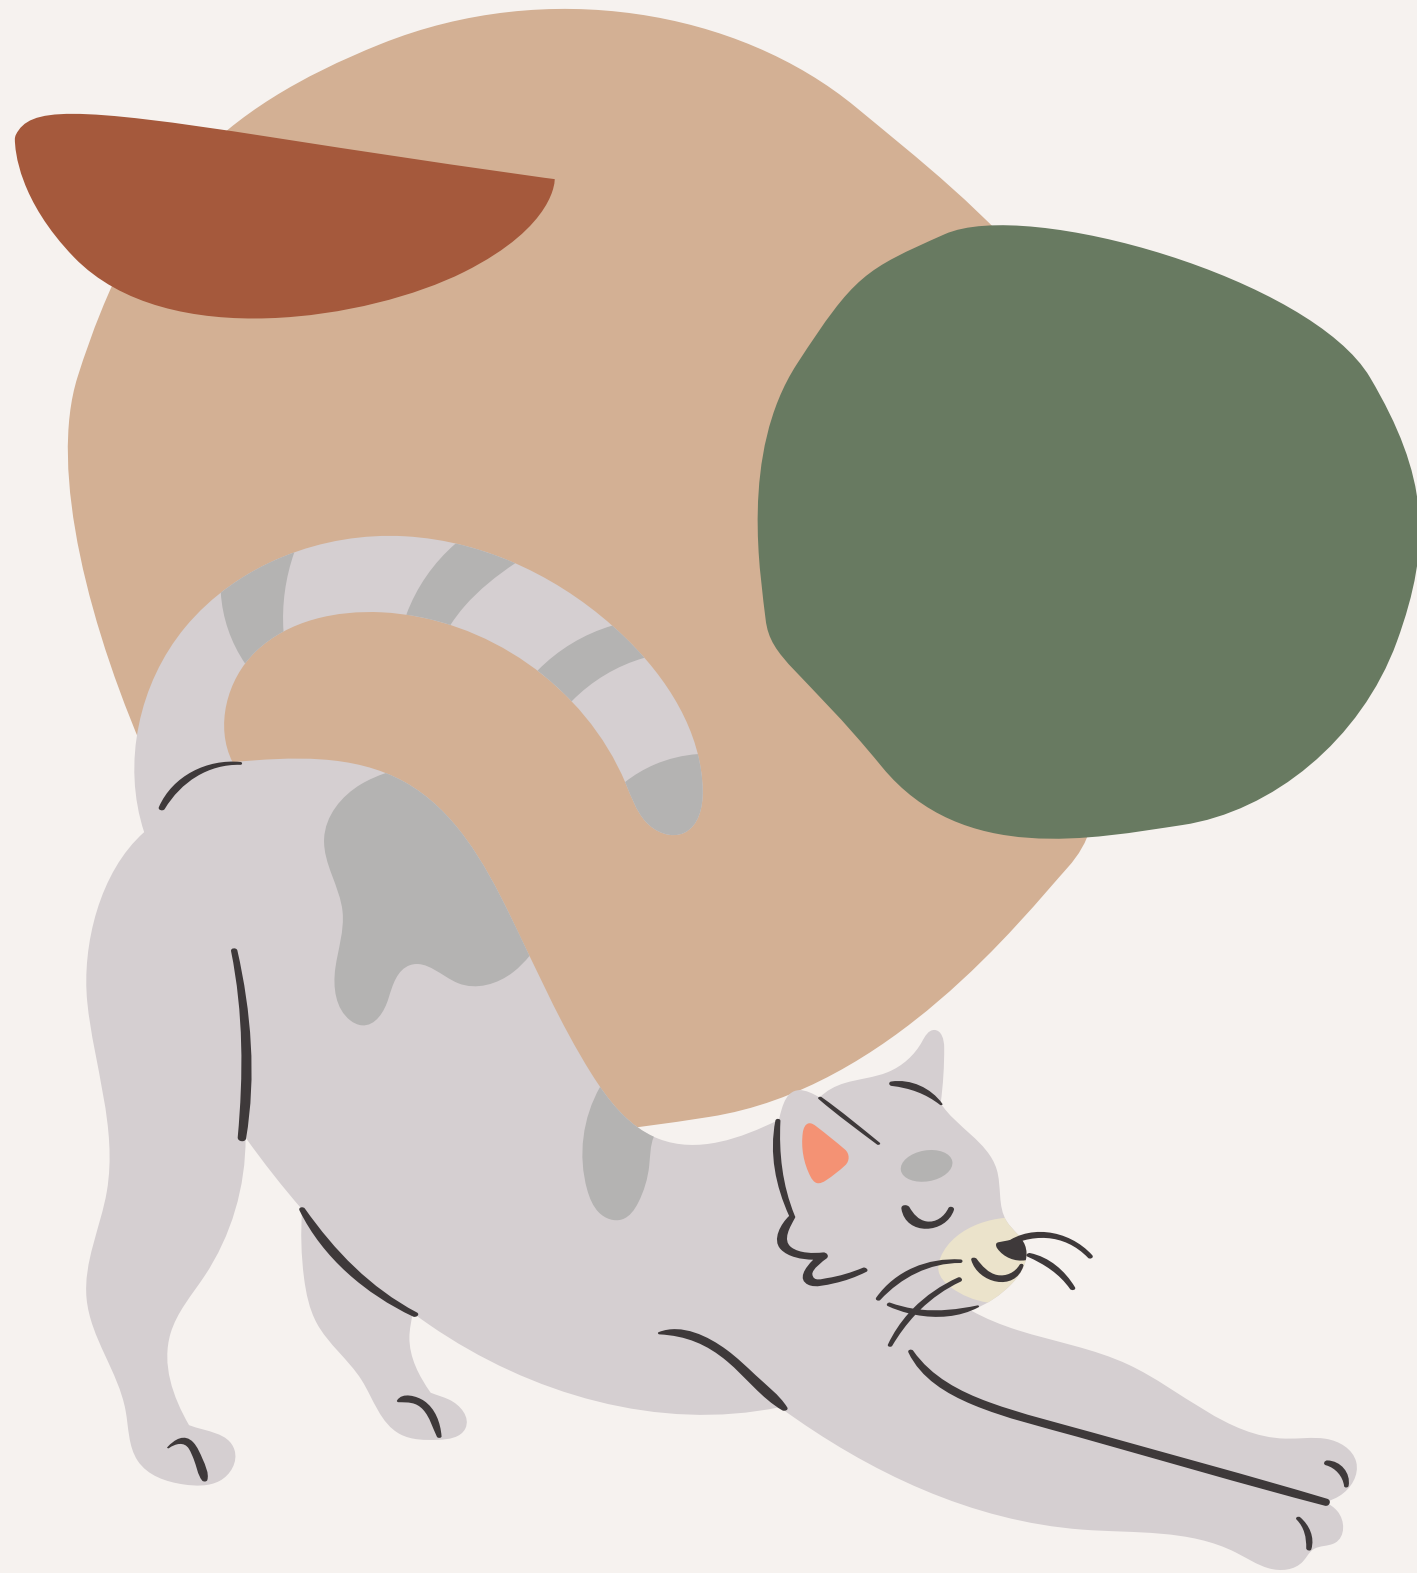

I don't want you to die, because of boring, so I will speed up.

I also love writing stories, journaling, in some strange way drawing, acting, reading, listening to developing podcasts, managing projects (just look at my passion when doing it), making plans and stick to them. I want to learn cooking and found out it's my next hobby.

Too much wishes and not enough time to fulfill my interests, I know.

# Thanks

for reading about me!

Hope you had great time and you don't  
feel at all like you wasted your time on it!
