

# MY DREAM JOB

PILOT

IN 7 STEPS

1

## DECISION

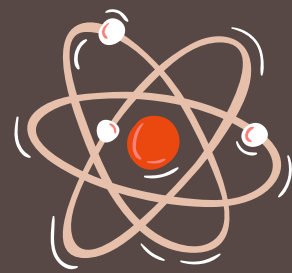

When I was watching a airplane crash program on TV, I found the planes to be very interesting and decided that I wanted to work in the aviation industry.

2

## HIGH SCHOOL

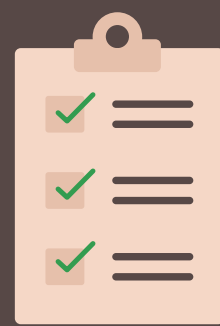

I plan to study in high school on a mathematics and physics profile with extended English, because I like these subjects and I am going to write my A-level from them.

3

## A - LEVEL

I want to get the best possible result on my A-levels in Mathematics, Physics and English because it will be important when recruiting for studies.

4

## STUDIES

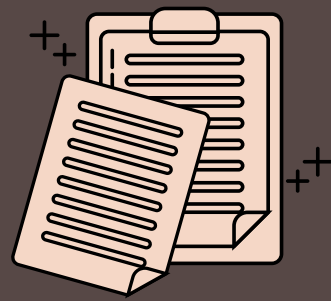

I will try to get to the Military University of Technology in Warsaw, the faculty of "Aviation and Aerospace". I will study for 5 years.

5

## EXAMS

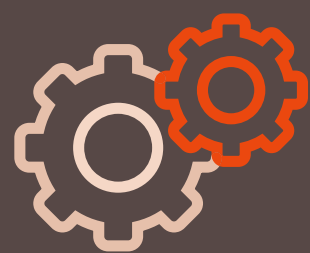

In order to graduate, I have to pass military and diploma exams. Then I'll become a second lieutenant and get a master's degree in engineering.

6

## MILITARY SERVICE

Then I will be assigned to military service, where I will perform avionics and air force duties.

7

## CIVILIAN WORK

After fifteen years of service, I will be able to retire or apply for a job in the aviation industry, e.g. as a passenger aircraft pilot or flight engineer.
