

MY DREAM JOB

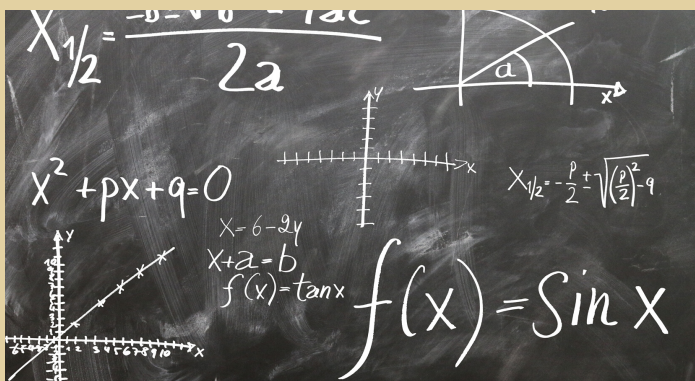

PILOT

2019 - 2020 FIRST DREAMS

I started to be interested in aircraft construction and air traffic.

I've decided that I'm going to do my job in these areas.

2020 - 2024 HIGH SCHOOL

I will study on a mathematical-physical profile.

During this time I will be training athletics and preparing for the A-level to have the best chance to get to the studies of my dreams.

2024 A - LEVEL

At the end of high school, I will write my A-level.

I'm going to write extended A-level in mathematics, physics and English

2024 - 2029 STUDIES

I'm going to study in Warsaw at the Military University of Technology (WAT).

I'll probably choose the faculty "aviation and aerospace". The studies will last 10 semesters, or 5 years.

2029 EXAMS

At the end of studies there will be an officer's and diploma examination

If I pass the exams, I'll get the titles: Master of Engineering and Second Lieutenant. Then I can start working..

2030 - 2045 JOB

I will be on military service for 15 years.

The service will be related to aviation, avionics and air force - that is what interests me.

FROM 2045: RETIREMENT OR CONTINUED WORK

After my military service, I have two choices.

I can start working in the civil market, e.g. as a pilot, flight attendant, stewardess or air traffic controller. I can also resign from further work and retire.
