

# Erasmus+

**SMART Hero Creative and collaborative teaching**  
**17 June 2020**

**at Smart Hero Week**

**Project Erasmus+ KA229 - School Exchange Partnerships**  
**I AM MY LIFE HERO**

## AIMS

As the coordinator the Polish partner is to organise Smart Hero Week to present our educational ideas based on modern technology. We are to show how to introduce programming into Maths, art and a foreign language studies. The Erasmus partners will participate in active work of newest applications and Ozobots. Students will have opportunities to see experiments, playing with robots, the use various apps and programmes and the newest ICT tools. We offer activities which develop a positive identification as a hero of modern learning styles and show everyone how the cooperation and exchange of good experiences is valuable and important in life. For the teachers participants the event will give a chance to broaden their competences, study methods, and school system. For all the partners the venue is a challenging event to share the ICT methodology knowledge and skills to introduce them in their own teaching.

We'd like to invite the partners to take part in the visits around Elbląg and the area sightseeing the unique cruise on grass along the Channel and the Malbork castle as well as the Baltic seaside with the visit of Gdansk.

## *Be yourself and look for your own way*

The primary school no 12. Due to a high level of unemployment 700 students come from families of different economic and social position. Some of them are brought up in very poor families in financial and cultural sense. There are some who get social grants for school objects at the beginning of each year and free dinners. Some students receive various psychological support like meetings, workshops and culture support. The school has been looking for other sources of helping the students with special needs. It has participated in various projects which dealt with pedagogical, methodological, environmental and safety issues. For many years we have been cooperating with different institutions in the following areas: tolerance, promoting acquisition of foreign languages and ICT skills as well as caring about environment, sport and health. Facing the problem of drop outs, we've introduced the workshops informing about jobs and self developing. The most important school actions of European dimension are Comenius project Let E Be 2010-2012, Litter Less campaign and Eco Schools, National programs like Teaching how to code and Teaching PE and others of the local area. For 10 years the school has been participating in eTwinning projects supporting ICT and English acquisition. We always try to engage the whole school community, mainly parents and other nearby organisations, local societies, libraries, kindergartens and small business. The last few projects were devoted to programming and coding in order to develop integrating skills. The school organises Technology days for kindergartens, the disabled and parents. It proposes doing experiments, coding, using robots, tablets and various applications aiming towards teaching logical thinking, creativity and teamwork.

As the coordinator we are to hold Smart Hero Week during which we are to present our educational ideas based on very modern technology. We want to show how useful it is to introduce programming into Maths, art and Polish and a foreign language studies.
