30 CLASSROOMS
25 LABORATORIES
SPORTS ROOM
LIBRARY
CONFERENCES ROOM

ENGINES LABORATORY

HAIRDRESSING LABORATORY

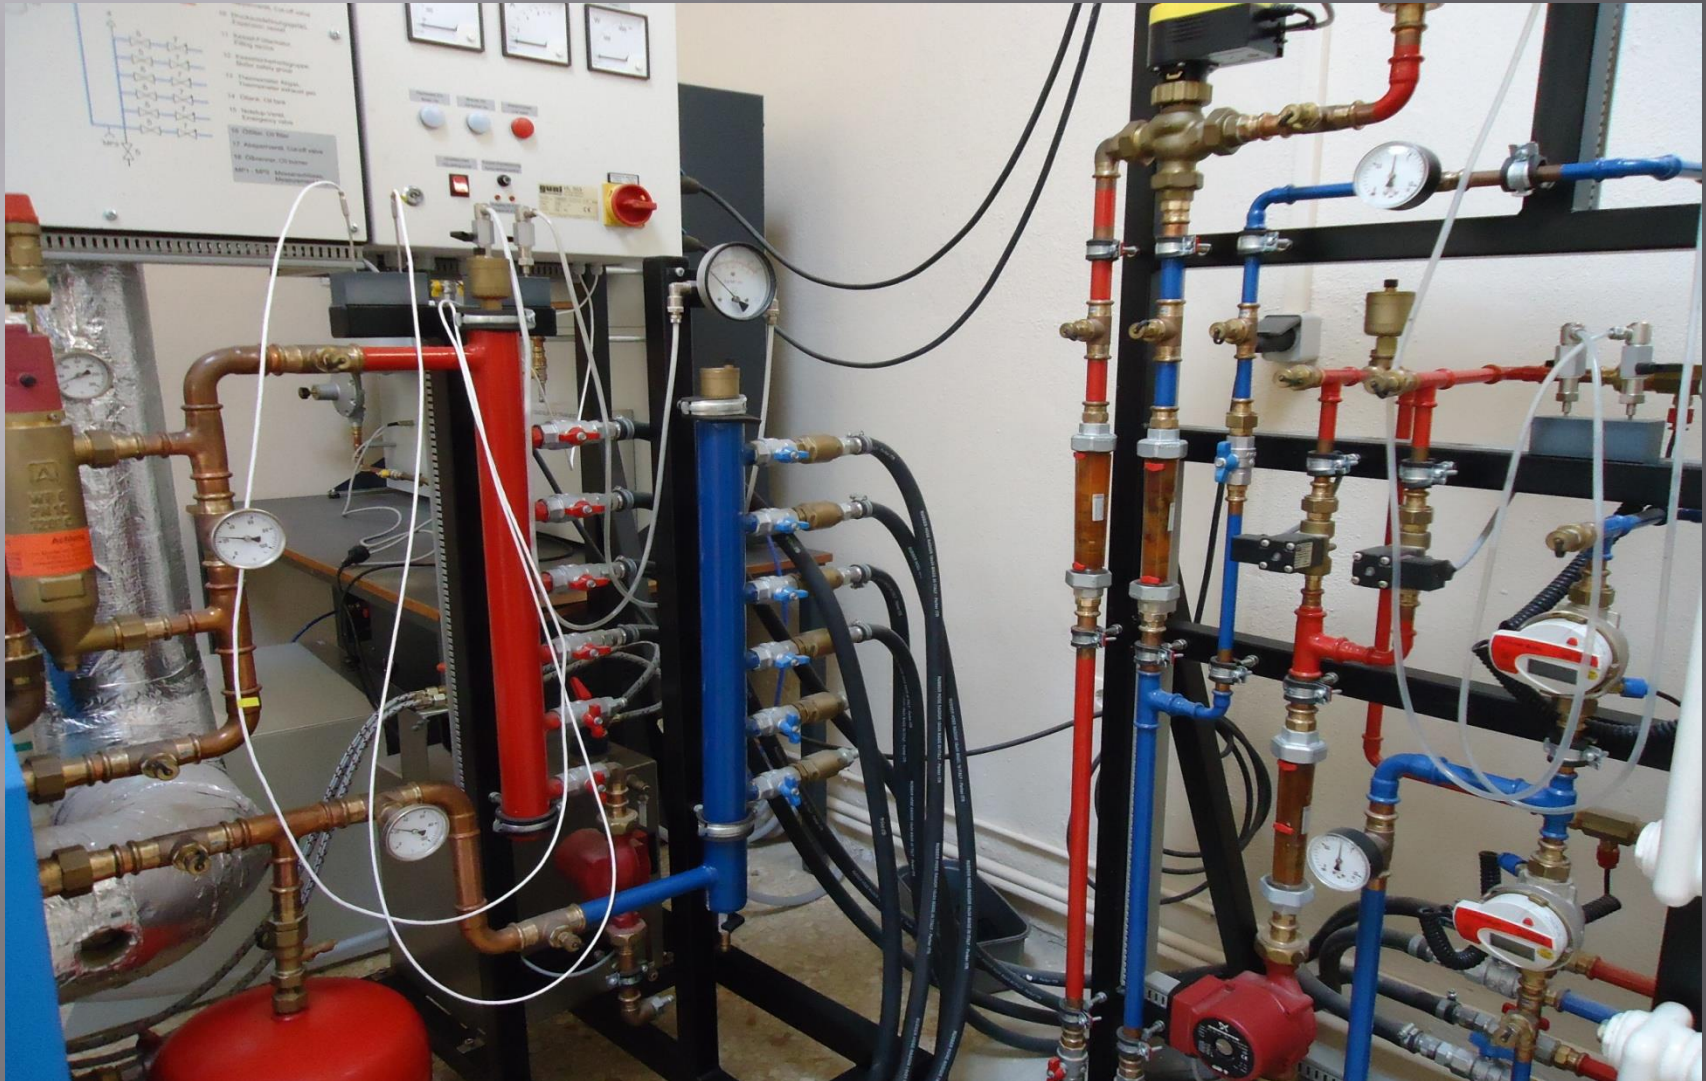

ESTHETICS & BEAUTY LABORATORY

TOOL MACHINES LABORATORY

HEATING LABORATORY

ELECTRICITY LABORATORY

Lessons are both theoretical and practical. Our students are learning whatever they need to know about the profession they have chosen so as to create better conditions for transition to working life but they have to attend general education lessons as language, maths, history, Computer science and ICT etc.

In our school there are available five fully equipped computer laboratories and additionally computers in every laboratory to facilitate the educational procedure and practice.

In our institution the priority is to provide different learning opportunities for our learners, so we are working in different projects with them out of the curriculum (as environmental, health care, orientation, outdoor activities etc).
