START-UP

We are students of the class 4L from the school "I.I.S Einstein-De Lorenzo" Potenza-Italy, in 2018 we created a startup reinventing cuckoo clocks by making them smart.

KooReminder has been designed in the "E-commerce for start-ups" context. The Erasmus+ project, financed by the EU addressed to teachers, students and the staff of our school, involves other schools from 5 partner Countries: Spain, Bulgaria, Greece, Scotland, and Turkey. The project let us develop entrepreneurial skills, creativity and initiative, thus allowing the students to live an entrepreneurial experience in various Countries.

PRODUCT DESCRIPTION

KooReminder is a smart clock that with its design reminds of the past.

LCD Display

Alarm and reminder

Programmable via smartphone

Materials: Papier-maché

Hardware: RaspberryPi
