**Papier Maché Lab**

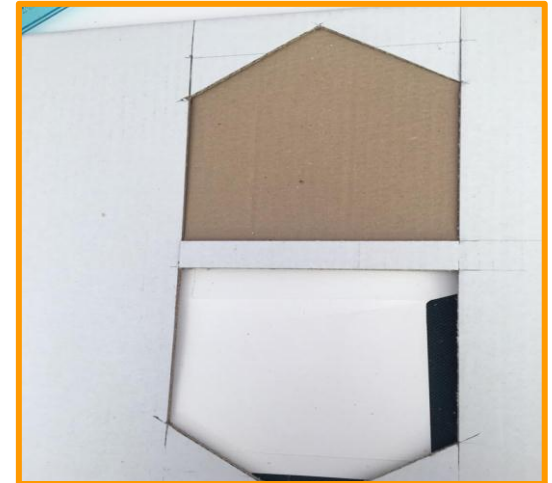

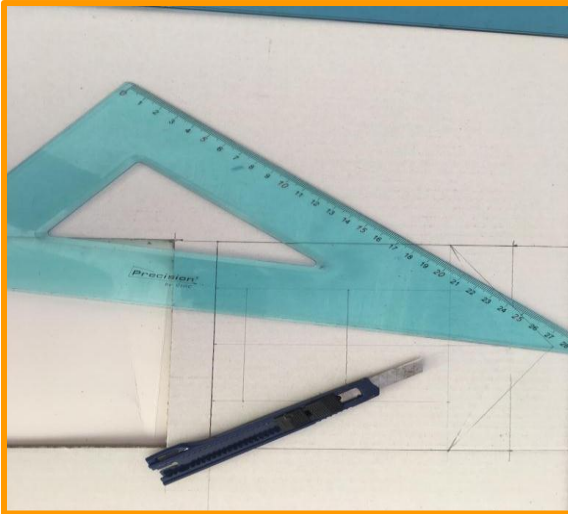

# PAPIER-MACHE' LAB

**We're going to show you how we created our product**

# FIRST STEP

We cut the cardboard in a house-looking shape and we left a hole where the Arduino board can fit

# SECOND STEP

**To create our product we used the art of papier-mâché**

**How to make it?**

# INGREDIENTS:

- A bowl
- Flour
- Vinyl glue
- Newspaper
- Water
- Mixer

**Rip the newspaper into  
small pieces...**

**...and put them into a  
bowl with water**

AFTER 24 HOURS IN WATER

**Remove the water from  
bowl and blend wet  
newspapers until they  
become a mixture**

**Then, pour the vinyl  
glue and flour in  
and mix all  
vigorously and the  
“soup” is ready to  
be molded**

**After we've made the papier-mâché, we stick it on our "cardboard house" and insert the Arduino board into the empty slot.**

FINALLY

**'KooReminder**  
is ready to be built!
