

# AUTISM

Milena Klasa kl.6a

# WHAT IS AUTISM?

It is a disorder related to the brain not working properly. Autism can manifest itself in different ways from person to person. But regardless of the individual manifestation of symptoms, all people with autism have difficulties with social relationships, communication, and imagination.

# SYMPTOMS OF AUTISM

## Autism - symptoms

avoiding eye contact with  
other people;

not babbling as an infant;

no reaction to the name;

delayed development of speech skills;

difficulty maintaining a conversation;

frequently repeated phrases;

apparent difficulty in expressing your own feelings.

When most often fears autism ?

The first symptoms of autism appear most often before the child is 3 years old. However, the research and reports of parents show that they often notice some disturbing behavior even in the first year of a child's life.

**AUTISM**  
AWARENESS DAY

## How to talk to people with autism?

Autistic people often interpret language literally. Communicate with them literally whenever possible. Before giving them an order, ask yourself how it could be interpreted literally. Also, don't use slang or colloquial expressions when talking to them.

# AUTISM AWARENESS DAY

World Autism Awareness Day - a holiday celebrated annually on April 2 at the initiative of Qatar in the person of Her Majesty Mozah, wife of Emir Hamad ibn Khalifa al-Sani, endorsed by the UN General Assembly by a resolution of December 18, 2007 and published on January 21, 2008.
