

# Autism

---

First question is „ What is Autism”.

Autism is a illness, actually development disorder.

People with this illness aren't grow asleep like other people, they grow asleep a little bit slower.

Many people say autistic pepole are „other”, I think better word is „unusual”.

# Symptoms of autism

---

This is the most important symptoms

People with autism takes literally everything. Like when you use a sarcasm autistic man take this literally.

They develop speech slower than other people.

It's hard to him to make friends.

# World Autism Awareness Day

---

Autism is too popular illness so it have a special day

The World Autism Awareness day is on 02.04

In this day everybody wear blue clothes

this is day when everybody is the same
