The schools

- E10172207 I.C.GIOVANNI FALCONE ItaliY
- E10168534 Osnovna skola Sracinec Croatia
- E10059986 Nuestra Señora de la Consolación Spain
- E10111928 Collège Alexandre MACAL France

The countries

We'll go to Valence (Spain) 00:00:00:00
Jours Heures m s

- Belgique : Thierry (Libramont)
- Espagne : Marcos (Valence)
- Croatie : Janja (Sracinec)
- Italie : Irene (San Giovanni La Punta)
- France : France-Lise (Saint-François)

Countries and coordinators

Budgets

- Nuestra Señora de la Consolación Espagne : 28.533,00 EUR
- Collège Alexandre MACAL France : 42.920,00 EUR
- Institut Saint Joseph Belgique: 36.129,00 EUR
- Osnovna skola Sracinec Croatie : 28.533,00 EUR
- I.C.GIOVANNI FALCONE Italie : 28.533,00 EUR

164.648,00 EUR

Budgets

- Project management and implementation : 6000 EUR
- Project management and implementation : 12 000 EUR for Belgium
- The rest of the budget must be devoted to mobility. Please note that if the mobility is not carried out, this budget must be reimbursed.
- For the 6000 EUR, the money will remain acquiesced unless our end-of-project evaluation is poor!

- Website

- As described in the project, we must use a professional company to create this site.

I have an appointment on Friday with a company that is going to create a site.

This site will have the advantage of having a part in which we can add information ourselves. Each coordinator will therefore be responsible for bringing the site to life ...

Proposition : the cost of 600 € will be shared by each country at the rate of 100 €. Belgium will pay € 200 as we get more money.

What site name?

Communication

- eTwinning
- We have an obligation to use this platform. A group already exists but we have to adapt the eTwinning project into an Erasmus project.
Who can take care of this?

ITC and geography at the service of the meeting of young Europeans

During our seminar in Bratislava, we created this group of 4 partners with convergent sensitivities. We have produced an agenda of 6 activities that will take place monthly from December 2019 to May 2020. These activities will allow our students to travel on the one hand in their country of origin by producing documents and on the other hand in the country of the partners. Each activity will be linked to the use of a different computer tool (powerpoint, video, ...). A book will be produced from the beginning of the project and will be sent from one country to another at the end of each stage. The finished product will be multiplied to be made available to each school. From now on, we hope that this project will lead to an Erasmus + project with a submission in February 2021.

Communication

- Facebook
- This private group can be used in a broad sense. Parents and colleagues can be invited to follow our adventures.
This can be very helpful in transnational meetings.

- Children from different countries present the life of a typical class in their school at the level of a weekly schedule, teaching, available materials, extracurricular activities, holidays. This presentation in the form of a slide show with videos is followed by a sequence of questions and answers.
As part of learning English, it will be necessary for the question-answer sequence to be done in two stages so that students at the start of learning English can prepare the answers with the teachers. This preparation can be done before the visit or during the stay!
The children will produce identity cards which will be present on eTwinning. These sheets will present "typical children" from school. It will also be possible to have records of real children. This card-based approach should allow children from other schools to understand the differences and similarities ... the idea would be not to use the same cards for all schools. The layout of the cards would already give interesting indications on what may or may not appear important depending on the country. Secondly, it would be possible to complete the sheets with any requests from other participants.
