

Project cofunded
by the European
commission

“Let's customize our funny space suit”

We are now on Mars, we have our spacesuit to work outside the Mars habitat. But we don't have our suit to work inside!

Working in group of three, you will customize this white suit into a funny and useful one you would actually like to wear!

Let's be creative!

INSTRUCTIONS

The suit has to have the name of the project.
In addition, pay attention to the fact that paint may go through the suit, paint one face after another!

Time : 30 minutes

Groups: 3 persons

Materials:

– 1 white painter suit

– various colored tapes

– safety pins

– brushes

– various tubes of paint

– 15 UV sensitive pearls

– elastic string

Have fun and be creative!

Thanks for cleaning the brushes at the end of the activity :)
