

# Welcome to GERMANY

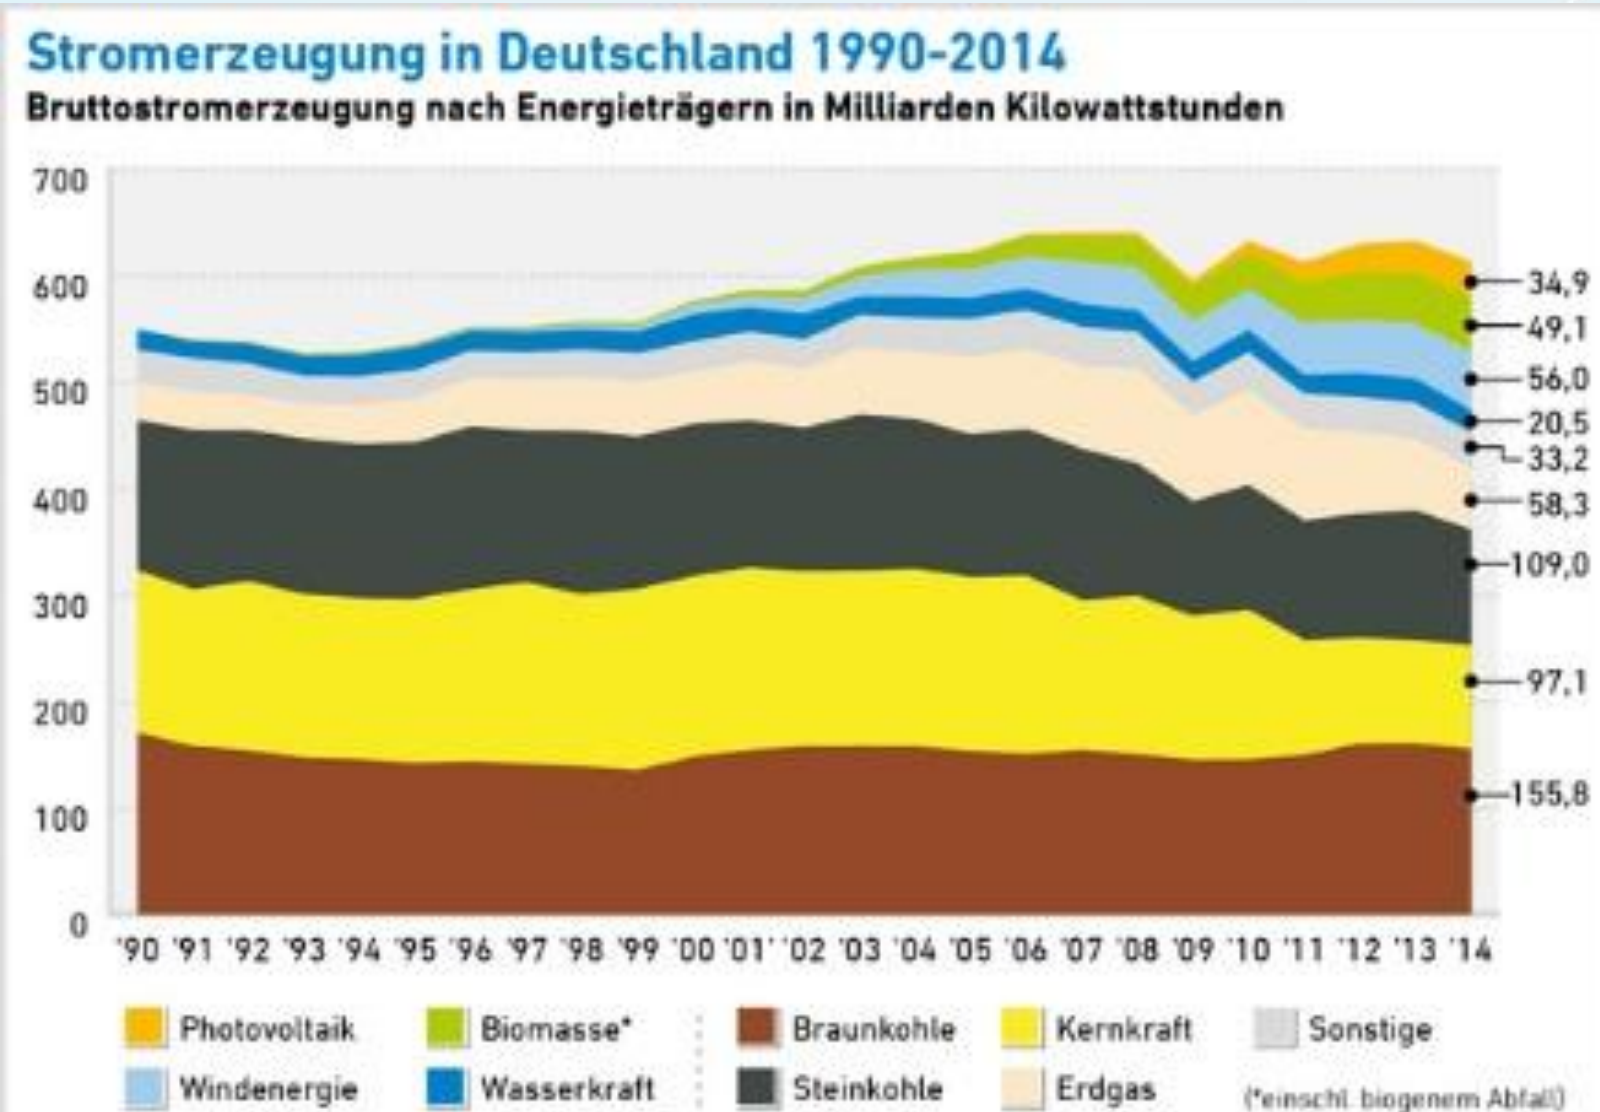

RENEWABLE ENERGIES IN OUR COUNTRY

# Structure

1. The development of the production of energy
2. Initiatives to support the development and use of renewable energies
3. Recent developments

# The development of the production of energy

- Perception of the environment and energy crisis in 1970
- Percentage of fossil energy sources is decreasing
- Percentage of renewable energy sources is increasing (since 2000)

Source: Agentur für  
erneuerbare Energien

# Initiatives

- German Renewable Energy Act (EEG)
- energy politics
- environmental awareness
- climate protection agreement (Paris Agreement, on 12 December 2015)
- Greenpeace → aim: 100% green electricity in Germany
- Annual Review of Environment and Resources
- Research and development

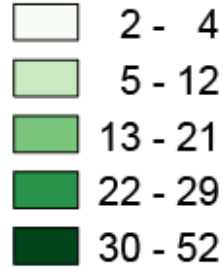

# Recent developments

- initiating nuclear phaseout since 2011
- technical improvement
- Euro-5-Norm (= a law concerning the exhaust emissions of cars)

## Anteil erneuerbarer Energien an der Stromerzeugung

Anteil in % an der Stromerzeugung

Stand: 2010
