

FEBRUARY REPORT OF ACTIVITIES

Kalskrona (Our town “Kalskrona”)

Our culture, our language, our country, our square... These are some of the topics we studied to carry out our February task: writing a hypertext.

A hypertext is a type of text displayed on a computer with references, also known as hyperlinks, to other texts or pictures that has

an immediately access. That’s exactly what we used to explain in detail the previously named topics.

First of all we distributed the topics among the different groups so that everyone had a theme to focus on. We wrote a previous

The Monastery (our square)

scheme to make it clear what we wanted to explain and then, we started researching about our topic. We used the information found in the Internet but

Midsummer (our culture)
“Kalskrona”

we also used our knowledge to complete the information. Once the information was collected we did an outline to plan the distribution of the information and how to tell it properly. Finally, we also included some pictures to make the information more visual.

It was funny! We are not used to search for information about our own country but it was great. The objective was to let our partners know about our hometown but at the end we knew a little more about it, too! At the end, we realized we have shared a little bit of an important part of us!

Anna Albalat (Spain) & Julia Svensson (Sweden)

False friends (our lenguaje “St. Cugat”)
