# 4. Please explain which part and why the webinar was most useful.

20 responses

The examples of practical activities

Meet other schools and activities

several small activities we can use in our lessons "problem solving": boat making, kite, balloon, ...

Working with children with special needs and children with ASD is at times challenging in terms of teaching-activities-planning. These activities can be used as a model. I am going to implement some of them in my class.

The examples of activities and how do the school integrate different subjects in the same activity.

practical outdoor exercises

It is amazing to see what you do with the students. I think we all have to step out of our classroom more. I think it is a better way for our students to learn. I wrote down some great ideas that I will try in school.

Importance of outdoor activities

The exposure of the different activities and games played by the students, due to the "work in team" and "outdoor "nature.

The sharing outdoor activities

Activities integrating several skills cross with curricula

We Are kompresser of how you use so many differensiert subject in to the outlook-activities, and how stuctured you are

Interesting to see how the subjects are integrated into the practical activities

I'm impressed. They are great projects.

Everything is well thought out and planned. It comes across as a whole. And a project can also be short, it does not always have to be very long.

Nice variety. We should indeed go out more and not be in the classroom as much.

How you legitimize the outdoor activities pedagogically.

# 5. Do you have any other feedback for the Romanian team?

20 responses

Thank you! You did a great work.

Good job!

Thanks everyone! You did a great job.

Congratulations

Congrats

Will done :)

Very good seminar

Keep up the good work.

You are also doing very well with your students

We would really like to visit your school and learn more about the outdoor activities!

Keep up the good work!

Good luck with your future work!

Congratulations!

well done on the webinar, it was very interesting!

Congratulations for the presentation. A global approach of education is very important.

It was very interesting to see how you arrange outdoor activities with the pupils and how well-thought these plans were.

Keep up with the good work.

Great job! Very nice activities!
