## CONTESTS

### LOGO CONTEST

This is how our logo came around, from an idea to a recognized icon. From the beginning, all participating countries realized that we needed an image in order to convey the objective of “Our Forest, our future” project. So we decided to organize a competition with that title in each participating country.

The response from all students was great and with all drawings presented, we decided to organize a magnificent exhibition.

We really struggled with the decision process and finding an idea whereby the logo would compete with other countries. Finally the logo that was put forward by Portugal was the winner and therefore, this is our project image.
