Hence this letter. We meet on the island of Gotska Sandön in the chapel on the longest day of the year. It is also a secret, so travel incognito. A boat is waiting for you in Boltenhagen. Do you want to help your fellow citizens? That would be great. See you

The place where they come together to make a plan for a peaceful Europe is an island in the Baltic Sea.  
On the uninhabited island of Gotska Sandön in the bunker of the local chapel they secretly prepare the order.

Because they do not know every 6,  
the 6 heroes present themselves to  
the reader and to each other

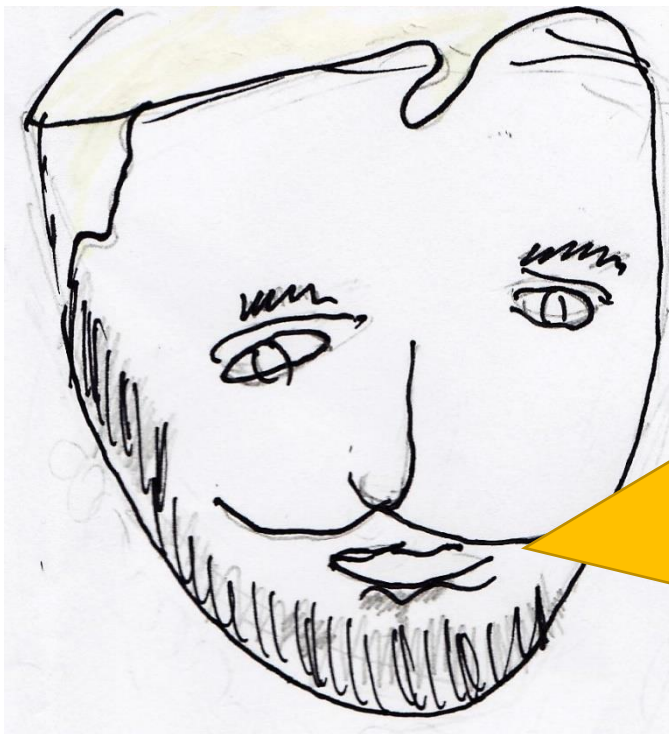

Hi, My name is Marie  
Curie, My contribution  
to a peaceful Europe is  
in the field of science  
and especially medical  
science. In the past I  
have been able to help  
many people in the  
First World War by the  
invention of X-rays.  
War is very annoying  
to me, so that is why I  
am here to fight for a

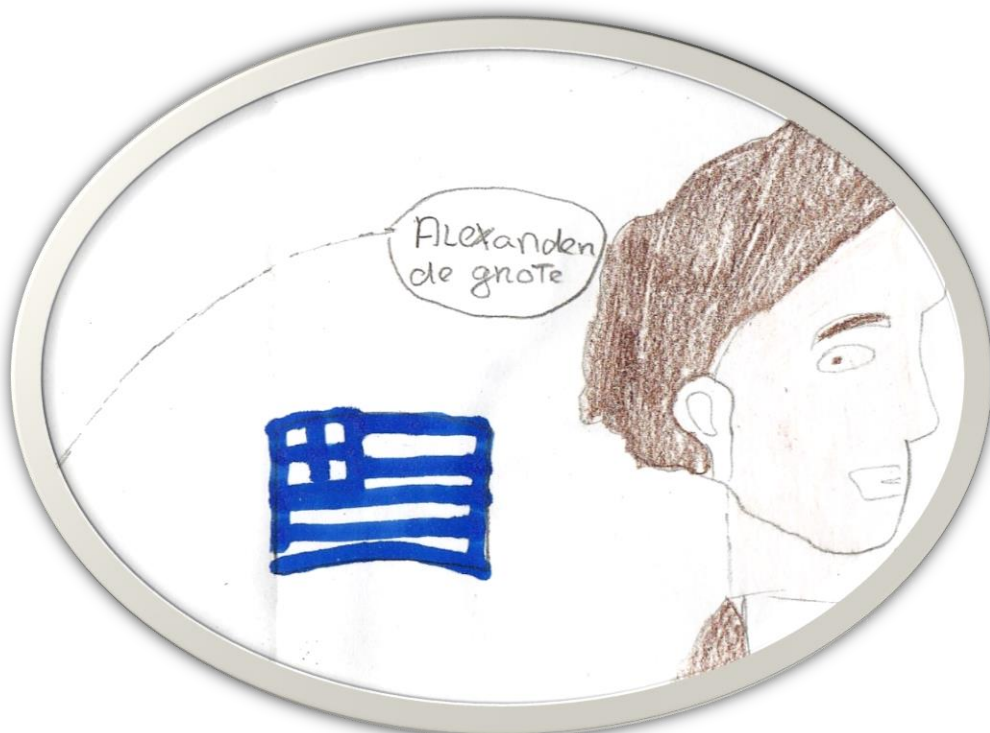

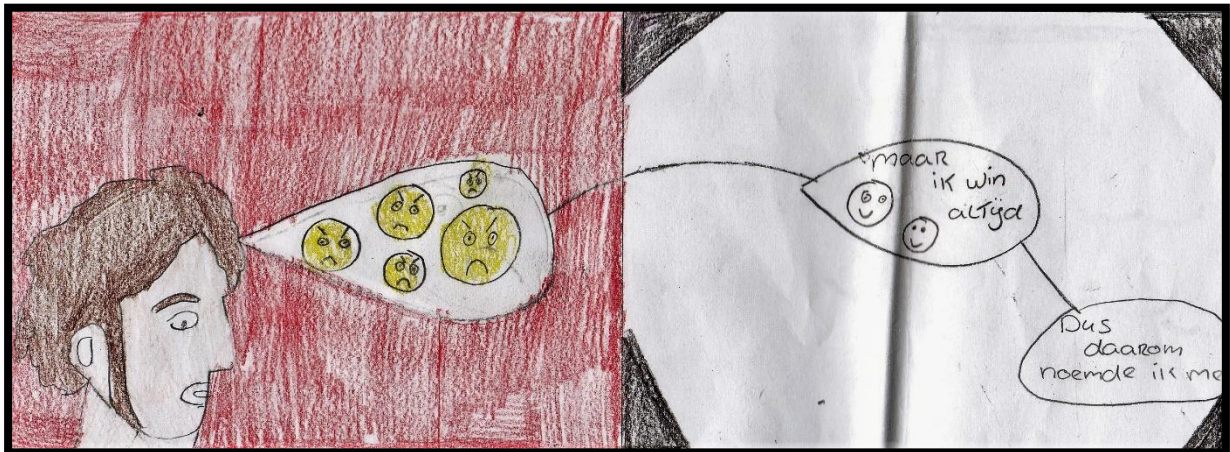

Hi, I am the funniest man in Eastern Europe. People also find me smart because I fight against injustice in a nice way, made by rich people at the expense of the poor people. I find it an honour to work with you and will try to use it with cleverness and humor.

Hello, I am William of Orange, I grew up at the court of the Spanish King Philip II and learned a lot, but I have noticed that the world is not honest when it comes to faith. I think that we must respect and accept each other's faith. That is why I rebelled against the Spanish king and became a kind of freedom fighter for the Netherlands

Hello, I'm Alexander. I became a king at a young age and made many enemies, but I was the winner very often. That is why I am called Alexander the Great. I never give up and can use my power to improve the world

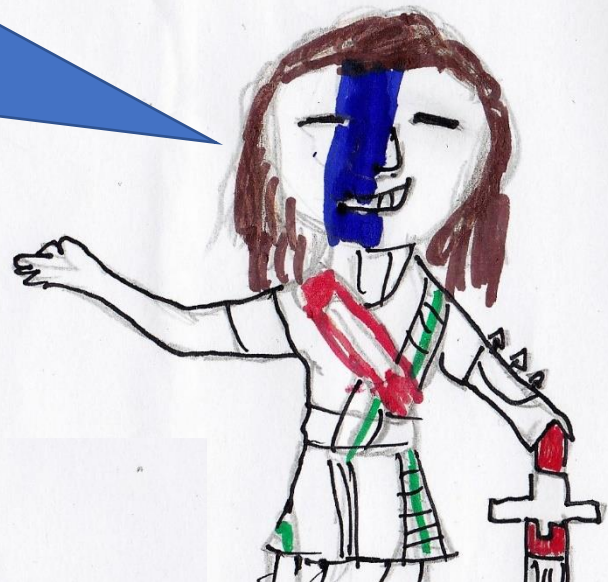

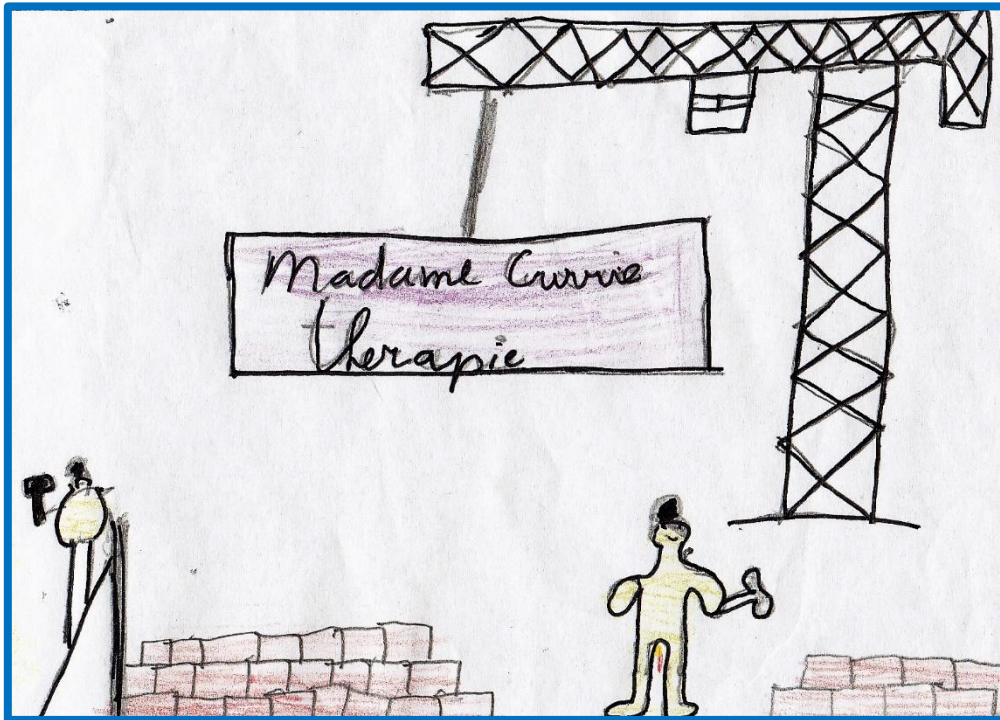

Hello, I am Julius Caesar. Like Alexander, I have a lot of experience on the battlefield, but also in politics. I am good for my people and try to bring people together. My contribution may be that I can talk, debate and persuade people.

I am William Wallace and like Willem van Orange I am also a freedom fighter. I fought against injustice that the English did to us Scots. I am not of nobility. I also believe that together we must create a better world. My talents are: perseverance and ruse and tactics. I like working with you.

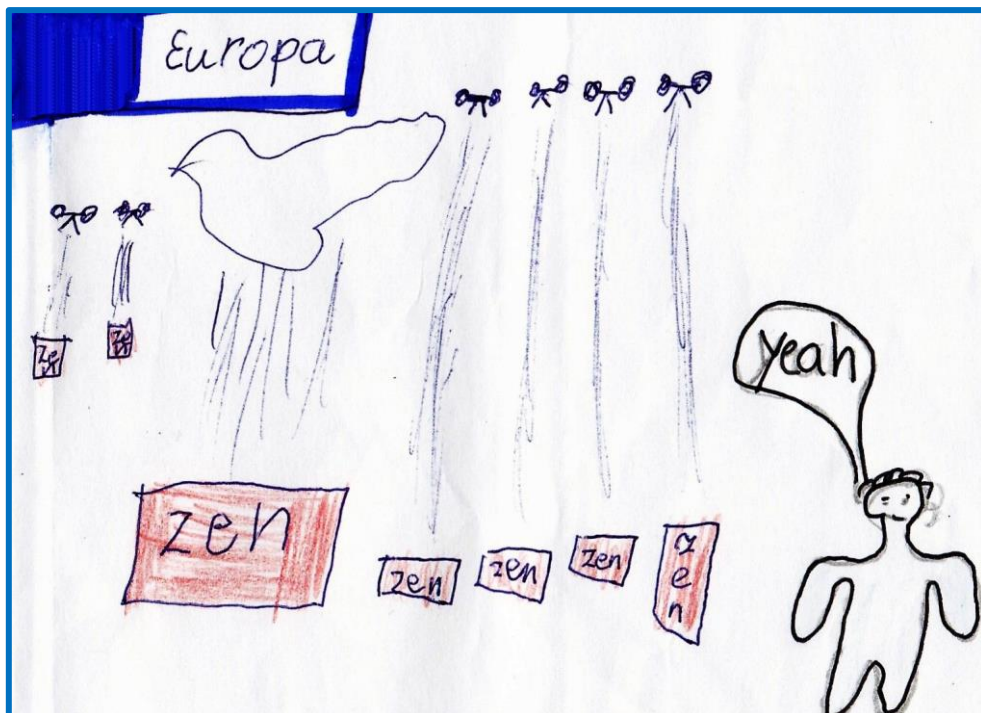

The 6 heroes give compelling advice to the people to come to a peaceful world. "We will help you with that." They say to us:

1.

Hyperactive people who cannot work together on therapy. **Marie Curie** is going to develop this. There will be a Zen agent that is distributed via drones over Western Europe.

It is not dangerous for non-hyperactive people. Busy people get quiet.

2.

Working together with everyone is impossible, but tolerance is.

**Hitar Pitar** is going to make this clear in a funny way.

H P gives funny positive messages via smartphones, messages that nobody can ignore. These messages are also distributed via the television, car radio, advertising signs along the road and through announcements in the shops.

3.

Bullies do not contribute to a peaceful world. **Julius Caesar** is going to approach bullyfollowers to make bullies clear that they stand alone. J.C talks with fellow suspects to show them the consequences of bullying. He is talking to them. He trains people, preferably ex-bullies themselves.

4.

**Willem van Orange** will use mediators. The mediators are clones of William of Orange. These mediators are sent to all parliaments and they are trained to use and spread peace policies.

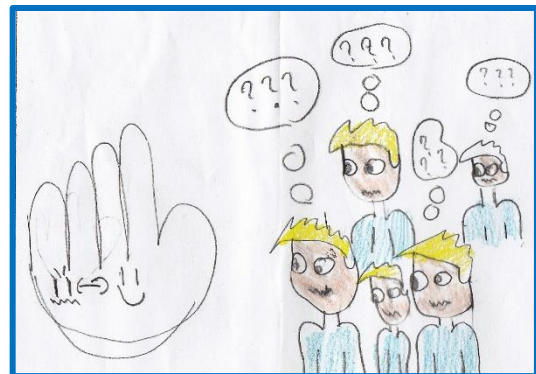

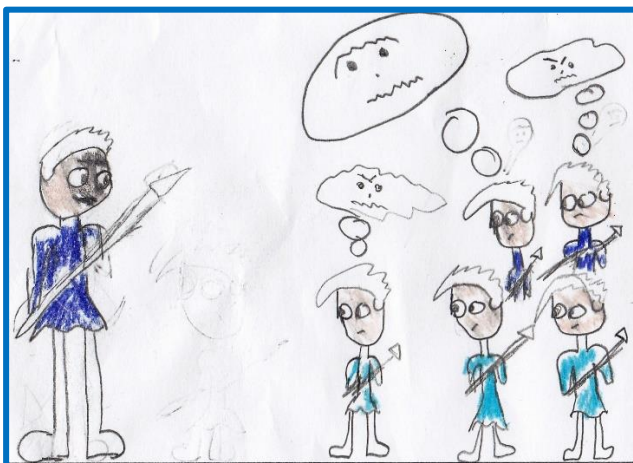

5.

**William Wallace** stands up for the poor hard-working people. To make this fightable and to fight together for peace, food and drink is very important. He ensures that a 3Printer food is provided. This energy rich food is made from Biodegradable waste, mainly leaves and grass and nut shells and seeds. These seeds provide the extra energy: They continue to work harder and give them a happy feeling.

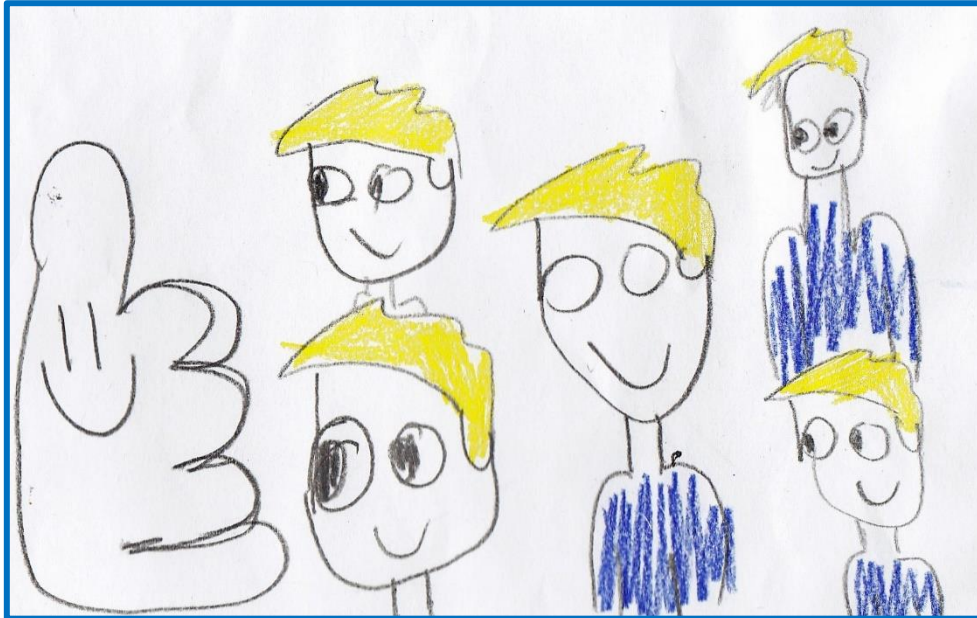

6.

**Alexander the Great** creates a peace army. This army consists of people with bad thoughts, but by Alexander these fighters are put on good thought by what they experience with Alexander. He trains them.

**Plot: it is up to the people themselves to solve it further.**

**It's their world!**
