

Italian Edition
n°3

November 2017

Outdoor fun!

November is the right moment to have a lesson outdoors and enjoy the fall foliage.

Children are full of joy when they could learn by doing, through discovery and exploration.

In the school garden they have the possibility:

- to observe the growth of the seeding plants;
- to learn the tree vocabulary, both in Italian and in English: roots, trunk, bark, branches, leaves, twigs, seeds, pine cones, etc...
- to collect different kind of leaves (colors, shapes, margins)
- to draw leaves and barks. Students choose trees with rough bark, and stick their sheets of paper onto the trunk, they may also collect leaves for a collage; or simply have a competition to see who grabs the most and have them practice their counting in Italian and English.
- to measure the trunk in order to discover the age of the plants.

- And then to bring Autumn inside the school!
