BlaBla

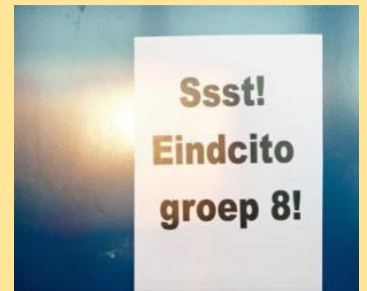

Final tests (CITO)

In the spring we (group 8) had done the final tests for secondary school.

All tests lasted 3 days.

In May we received the results.

There were many different subjects such as: reading comprehension, math, study skills, language, world imperfection, spelling.

The level programs that you could get were: vmbo, mavo, havo, vwo.

We got 3 more citos (tests) every day and it went very well, everyone is satisfied with his results.

This is our blabla.
