

WASTE SEPARATION

This year we really started in our school to separate the waste. We have new trashcans. So we can divide the waste.

The project was officially opened by an elder of Capelle a/d IJssel.

We separate::

Paper: We collect the paper and bring it tot he special place in our street

Plastic: We use the orange trash cans in our school

VFG: We use the green trash cans

Residual waste: We use the blue trash cans

Small chemical waste: There is a collecting point in our street
