

Istituto Comprensivo 3 Chieti (Italy) BLA BLA -November 2016

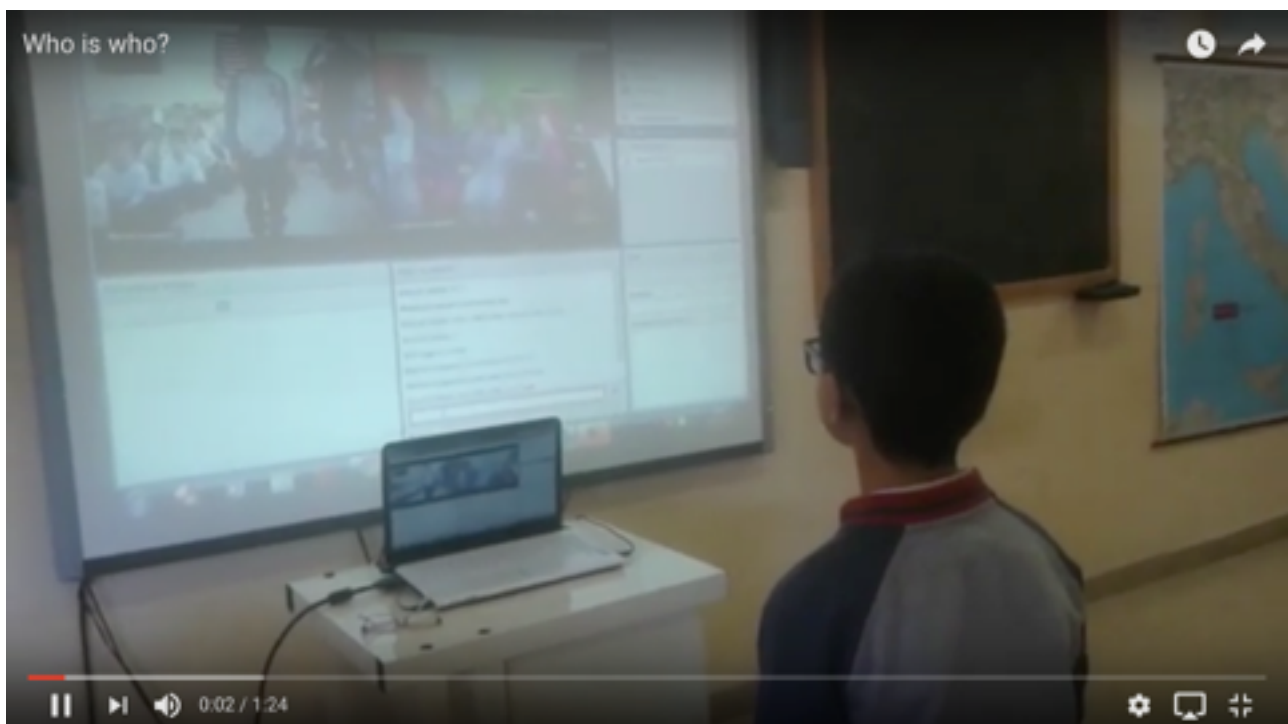

Just a few days ago, one of the classes involved in the Erasmusplus project “Joy in education”, the class 4B of the teacher Marina Screpanti, received a great news:

two **eTwinning National Prizes**!!!!

The first project who won the Prize is “eTwinning dream”. It is a very innovative project in which teachers teach English in real communicative contexts without the use of textbooks. All the activities are game based with offline and online communication.

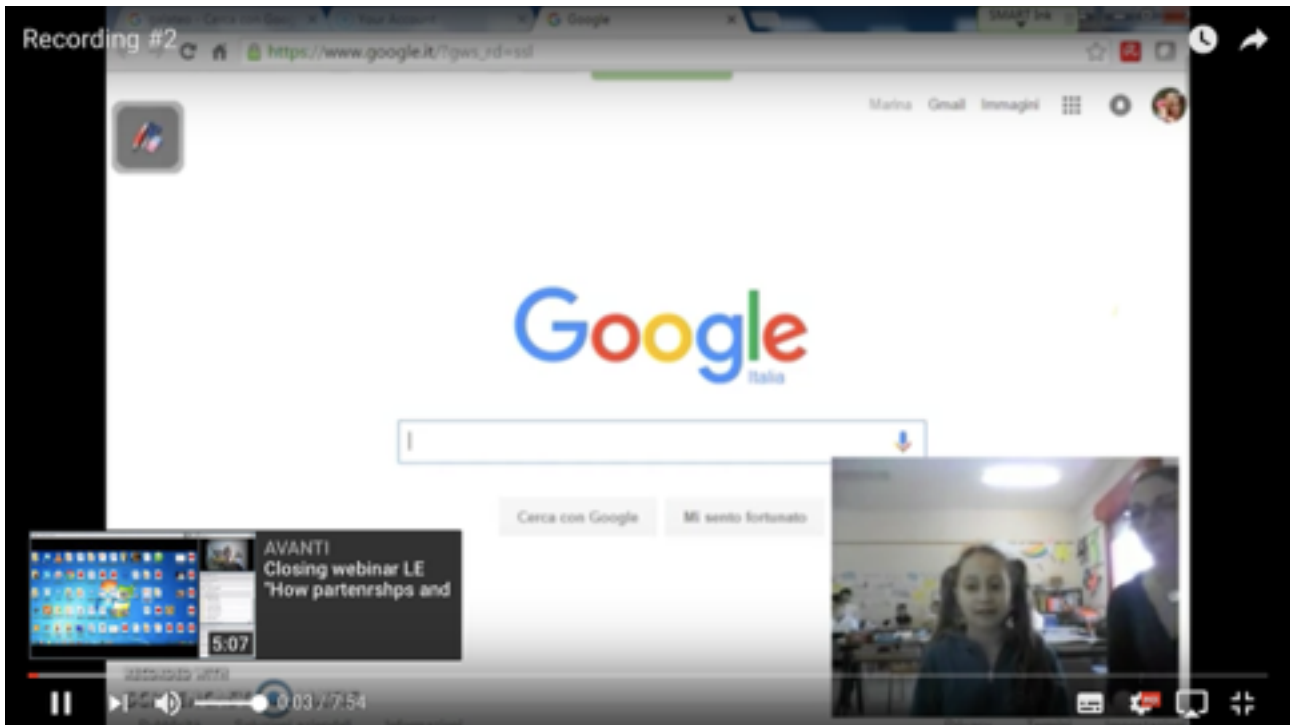

The project was very motivating for the students who increased their language competences and fluency thanks to very pleasant activities. At the end of the project, the partner teachers wrote the teaching strategy they created in a online booklet to disseminate the method, the materials and the outcomes. The link to the booklet is:

<http://www.calameo.com/books/0019259013cf216e20abe>

In the photo: Videoconference game “Who is who?”

The second project which was awarded is “WWW”, made by the same class. Basically, WWW is an exchange of tutorials made by students for students. Pupils wanted to teach their partner peers the web tools they had learnt during the school year. An eMagazine was born from this project in order to disseminate the project

products and process. The exchange of tutorials was very fruitful because students learn a lot from each other.

(In the photos: one the tutorials made by students and one student working with a web tool)

Thanks to these awards, a cameraman came to our school today to record a video to document the projects. It was so nice!

The two projects have the same point of view of Joy in education...having fun, playing, communicating, working together is the best way to learn!!!

The awards ceremony will be visible in streaming on November 18th starting from 9.30
