 From Easterfield Primary school, Fortrie, Turriff, **Scotland**: Kate Heggie.
 From Sp nr 11 Stefan Batorego, Inowroclaw, **Poland**: Katarzyna Sopolińska, Katarzyna Grzesikowska, Joanna Pstrong, Dorota Niezborala
 From Ou St. Kliment Ohridski, Haskovo, **Bulgaria**: Ginza Raysheva, Olga Milcheva, Ana Latunova.
 From pcb Het Baken, Capelle aan den IJssel, **The Netherlands**: Tineke Straver, Karin Morsch, , Hans van Embden.
 From Istituto Comprensivo 3, Chieti, **Italy**: Marina Screpanti, Enrica Polidoro.

Wednesday 8 November:

The partners met each other at a welcome dinner. The evening started with a recital on piano of the local music teacher. Every country took some special delights from their own country, so we had a international dinner and we could meet each other in an informal way. The headteacher welcomes us and gave us on behalf of the istituto some gifts . During the meeting there was the opportunity to dance and to sing karaoke.

4 of the 5 partnersschools stays in the same hotel Our host had made a special price for us. It was situated in Chieti Alto. To go to the schools in Chieti Scalo the bus was taken or the car.
 In the morning is was nice to see each other at breakfasttime.

Thursday 9 October:

From the Istituto Comprensivo 3 there were 3 primary schools involved in the project. All situated in Chieti Scalo. In the morning the children of primary school **Via Amertino** welcomes us at the gym with singing and dancing. One of the pupils was the presenter. She did everything in English. Before the coffee break The Greek partners and the Scottish partner did some teaching in classes. After the coffee break the other three partnersschools did.

At the end of the morning we were guided by pupils through the school and the schoolyard. We were impressed by the special rooms for science, music and handicrafts.

After Lunch: Work program as mentioned in the application: G. Implementation Page 28 and 29. See Attachment 1.

Workshops:

After the evaluation we had two workshop (A10) about Maths and gym. One arranged by Enrica (Italy) and one by Hans (Holland). All the material will be put on twinspace by Hans. So everybody can use them for the joy in the gym lessons and video's.

Cultur

After schooltime we had a guided tour by pupils of Via Amiterno through the old city of Chieti.

Dinner this evening , arranged by our host, was in Chieti Alto. The food was of a high quality, as you can expect from Italians.

Friday: November 10:

Morning: We were welcomed in the hall by the students of Via Pescara with singing and making music. Pupils guided us through the school and also here we were impressed by the special rooms for activities and the coming vegetable garden with the kaki tree. During the guided tour we were surprised by the effort that the children and teachers had done for us to show us there work, school etc.

After the coffee break , organised by parents, so we had lovely cakes etc., we walked to the third school at the **Via Lanciano**. The children were already waiting on the staircases and song some beautiful songs. A parent welcomes us and also at this school we got some gifts.

Enrica, one of the teachers, is involved in the use of science in the

lessons. And truly we are still impressed about this way of teaching language and maths.

After lunch we went on with the work program. See attachment 2

Workshop

We ended this visit with a workshop about Spaced learning. It was and it was not new information, but the way you teach you can have more results if you know how the brains works. So we hope that we will see spaced learned lessons in our Twinspace.

The **free time** after school was used for shopping, visit churches and the old town, and drinking some coffee/wine before we had at a quality pizzeria our goodbye dinner with a speech of our project coordinator. Also this time a good dinner for a good price.

Saturday 11 October: We went to primary school Via Lanciano to say goodbye to the headmaster and to get our certificates. We also were informed about the school systems in the other countries. After the coffee break we went our way. See you in Holland next year!

Our Italian partners have to work this morning in the classrooms. The Greek, Bulgarian and Polish partners went to Rome. The Scottish and Dutch partners stayed in Chieti and went for a drive and a walk in the mountains and to the Adriatic sea.

Evaluation and planning next visit.

M4 a and b: Date of the meeting in The Netherlands is planned from **11-15 April 2018**. That means a project meeting and a head teachers meeting about the pedagogical and methodological aspects of the project and the achievement of competencies.

Because it is not the most cheap country there is an advice to book: the Stay Okay hostel. Or Airbnb. School is by public transport half an hour from the City centre of Rotterdam.

On that meeting there will be a welcomes dinner at Wednesday at 19.00 h and a goodbye dinner on Friday at about 18.00 h

Evaluation: A1: The Question and Answer is not running as we want. We agree that every school will send every month a question to the partner schools. And will answer to the questions Every question and answer is combined with a photo. For this second year the questions will be about home and neighbourhood.

A2. The Blabla There is an special website for the blabla's. Not every school send their monthly blabla. We have to do this better.

The A7 runs to the end of the project. Not many videos are recorded till now.

A8 and A9 All the partners are working on it at this moment.

Attachment 2

Implementation

A10: Joy in the gym. Learning through P.E:

Hans will make a folder in twinspace. So everybody can put their pictures and videos and plans .

A11: Scientific joy. Enrica and Marina tell us more about it. The effort is to make a new classroom.

A12. CLIL is one of our main targets. There is a format to make all the lessons in that format. It will be the head subject of implementation after the project. All partners put on their CLIL lessons in the twinspace folder.

A13. Joy in history. Every partner sends a national history hero (no sports). The children look in books and websites what kind of hero this is. With the 6 heroes they will make a history comic.

Extra: of course we agreed to send eaht other Xmascards made by the children. Same as in 2016.

Hans van Embden,
27 November 2017
