

Activities with the toddlers in kindergarten

For the first time in group 8 activities are being done with the toddlers. We started to read aloud to the toddlers. That went very well, so we went a step further and we switched to games. The

games were for toddlers and group 8th.

That went better than reading, so we went a step further! So, then we went outside to play.

The best-known thing when playing outside was hockey and football that attracted the most children. And the toddlers beat the group 8th. At the end of the outdoor play, the children gave a hug to the group 8th.

Afterwards everyone went to the class. Most children like to play again but in the end it did not happen anymore.
