

Splash

Tuesday 14 November, we had a lesson from splash. Splash is established by CJG (centrum of youth and family). They give a lesson about how much sugars there are in a package, and how long you need to walk or cycle to lose all those calories. And the AA drink were the most sugar cubes. It has 9 and a half cubes in it! Because everybody had to calculate a package. And by

the end and we got a bottle.

We use the bottle to drink water instead of sugars drinks!
