

# How to make a simple model of wastewater treatment plant

## YOU WILL NEED:

- two plastic bottles
- filter paper
- fabric
- stones, sand, soil
- water in cup

## STEP 1.

Take two and  
bottles cut in  
half

## STEP 2.

Insert the cut-off piece of plastic bottle into its bottom part as a funnel

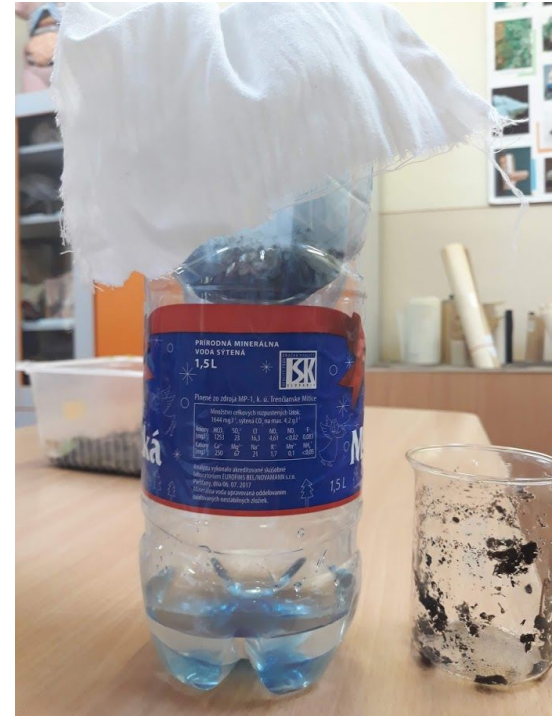

**STEP 3.** Add a filter paper to one funnel. To the second funnel, put a stacked piece of fabric

1. Water in the cup pollute by sand, stones, soil...

2. Pour polluted water in to prepared funnels

3. Repeat process until water will be clean

4. Make notes about the numbers of cleaning process
