

LiveBoard Interactive Whiteboard

LiveBoard is a free interactive panel that lets you design, visualize your ideas, collaborate, and chat with your students or colleagues in real time!

This collaborative program offers among other things: practical design tools, multiple interactive tables, live collaboration and chat.

LIVEBOARD CHARACTERISTICS

- ✓ Collaboration in real time with an interactive table
- ✓ Instant messaging - in built-in mode without having to change the application
- ✓ Realtime design and table sharing with an unlimited number of participants over the internet
- ✓ Unlimited number of tables to draw
- ✓ Share your creations through social networks (Facebook, Twitter, Skype, Google+, Viber) and email
- ✓ Save your plans from the table in your device's collection
- ✓ Take a picture or upload pictures from the device

- ✓ Brushes in various colors and erasers
- ✓ Unlimited Undos and Redos in your footsteps
- ✓ Text tool to add notes and descriptions
- ✓ Basic geometric shapes to enter into your drawings
- ✓ Full access control - control who can make changes

✓ Completely FREE use

If you have an interactive table, you can use the Liveboard Web version (<https://liveboard.online/>) to design in the interactive table and your students interact with their tablets at the same time.

Create a new table

In the following way we can create a new table and plan on it. This list will not be available to anyone but us. This way you can prepare a table before presenting it to your students. Open the app and select **Boards** from the menu at the bottom Then press the **+** button and select **Create Board**

Creating a collaborative

Click the **Share** button, name your table, and then note the code that appears. **Press YES to start sharing**

You will now find your board in Sessions and will be labeled **LIVE**

Under **Users**, you can give or remove the drawing capability to the connected users in your table.

To re-use a shared table, you need to copy it from Sessions to boards

Join a live table

Open the application and press **+** and select **Join Session**
Fill in the code of the shared table and that's it.
