

Wednesday 8th. May, 2019

Today we had visited the ALP school in Malta. There we had done a workshop about CV and application. All students from Portugal, Italia, Malta and the German did a CV in English. A English CV is very different, to a German CV, because there you had from basic to high level courses. After this Workshop, we had visited the Teh Models Factory. This Factory produces very different things, for example Playmobil and machines. It ~~had~~ was very interesting, because I had never seen a Factory before. Then we went to Valletta, there we were in a 5D cinema. This film were about Malta and the History. It was very cool, because the seats ~~to~~ moved and it were with special effects, for example water come out of the seat before us, or wind. After that we were in Valetta and we were shopping. From the Barrakka Gardens was the view beautiful. After all this things we drove into the hostel and eat something.
