# A brief historical review

- ❧ The new school La Cachette was built in 1988. The previous school was situated just above , in a very busy street ( up to 2200 cars per day) The buildings were also very old ( over 100 years) . The new buildings are situated just nearby the previous ones, in a very calm and peaceful atmosphere. The architects had worked with teachers and parents and built a very original but comfortable and practical school. Original because the structure of the school itself , because of the bright colors used for the paintings and also because of the 2 large patios inside the school( where trees had been planted) which bring light to the building. Practical because of very well-thought rooms like a large play room to practice sport, a sleeping room for the little ones , and a beautiful library built upstairs .
- ❧ Our school always tries to offer its pupils new projects and various experiences to help them to open their mind to the wide world.

The school was built in 1912 , there were 2 separate buildings , one for girls and one for boys. Then , they built an extension, and finally decided to build a new one , below the busy road ,The new building opened its doors in 1988.The old buildings have been turned into flats for low income families.

the school seen from the road

The school now welcomes a little more than 150 pupils from the age of 2 to the age of 11.

It has 7 seven classes and 9 teachers (7 + 1 extra teacher to help us and 1 headmaster )This extra teacher is because our town has recently entered The REP system ( réseau d'écoles prioritaires) : Priority Schools Resort ,

# Playgrounds

In our school , there are 2 different playgrounds : one for the kindergarten

and one for the primary pupils.
