

# Integrating

**HOW IS OUR PROJECT HELPING TO  
INTEGRATE PUPILS**

# The « Ona and Vorn » project

Algeria

China

# The 'Ona and Vorn » project

Russia

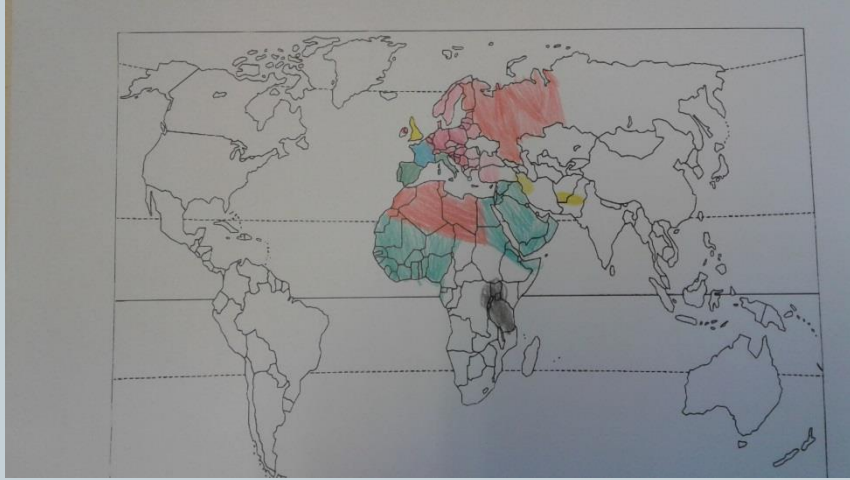

Morocco

# The « Ona and Vorn » project

- By welcoming parents , grand-parents and friends born in a different countries than France , we have helped our pupils to understand a different culture.
- They have learnt phrases in a different language , they have learnt about , food, landscapes , habits and writings that were different from theirs. They have been really interested , have asked a lot of questions and were eager to learn , and they have been so proud to write words in chinese or read their names in Russian's alphabet.
- Pupils who can speak a different language realized that it was a good thing , a lucky thing , not something to be ashamed of.

# The DNA testing

A map showing the different parts  
Of the world the tested pupils and  
teachers come from.

- Pupils were sure that the adults and pupils tested in our school were 100% « French »....
- They have been really amazed to discover that we were not !
- We talked about this and they understood that it was not a problem but a good thing.
- Pupils who had been tested testified that they were happy and proud to have some many different origins. That they wanted to know more about those countries or even visit them later when they are adults.

# The filming

# The filming

- Our tested pupils have spent an extraordinary day !!!
- They have played games together .They have done drawings together , the eldest ones helping the youngest.
- And , most important : they have discovered their origins....

# The filming

- Even if it had not been an easy thing to collect reactions from the youngest pupils, the eldest ones fully understood the meaning of their results.
- It has been a shock for all of them, a happy shock!
- They were all excited about the idea of having some many different origins, some of them were expecting such a result but most of them were 100% sure to be 100% French ...
- And the common reaction was happiness: happiness to be citizen of the world, happiness to have different origins.
