## Food habits in Europe

### Our surveys

[Add item](#)

#### Food habits

Food is essential for the human being.

But what exactly do we eat? Where do our foods come from, which ways do they travel? What influences our eating behavior? What does our way of eating have to do with the climate crisis?

With this survey we want to learn more about our and your eating habits. It is important to eat with consciousness.

[Survey Poland](#)[Survey Italy](#)

#### Evaluation of the survey

This is the evaluation of the survey on nutrition in which you all participated.

"How do our eating habits affect the environment and the climate?"

Are there differences, similarities and which is probably the most popular food of all nations?

Curious?

Class 10b evaluated the survey and created a
