

# COMICS

During our trip to the "Klimaarena" we had a workshop where we designed some comics about the climate change.

This is one of our comics.

A few weeks later we ha a workshop with a professional comic designer.

He showed us how easy it can be to design a comic on your own.

We collected some ideas...

... and designed our own comic together as a class.

This is our final comic:

Politicians: we must... we should...

Citizens: what' should we do?/ We must do something!

It contains three different little comics. Each of it addresses another issue

man: Of course I'm eating mindfully! Balanced, healthy and organic!  
 fruits: the sun in Spain was so good!  
 potatoe: I travelled trough Europ!  
 bread: I'm made of ukrainwheat!

Man: Cheap clothing has basically only advantages! Every week new clothes!  
 And when they aren't trendy anymore...  
 ... I can donate them!  
 The best thing about it is, I make other people happy with my old clothes!  
 little girl: But we always meet twice in a lifetime...

women: I feel bad for flying just to see the desert!  
 man: nonsens! That's clever! Our co2 emissions affect the climat but when you have the desert infront of your hours you don't have to travel anymor!!
