CORONAVIRUS TIME

# PRESENTATION

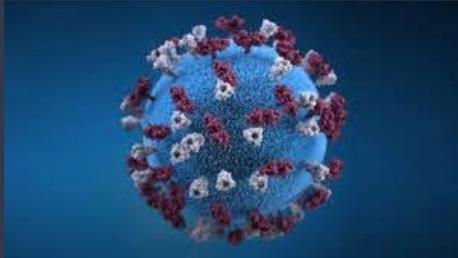

Hello, my name is Alba P, I study at IES Blas Infante.

I live in Cordoba, Spain.

I would love to visit another country and talk to children from there!

# CONFINEMENT

The confinement caught me by surprise; it was going to be 15 days but then it went up to 3 months or more.

I felt very sad because I was bored every day and without seeing my friends just by phone call.

I missed the fair, the birthday of my cousin, my aunt and my grandmother.

The tasks by mail were many. Also I could not organize well because it was something new for me.

# SUMMER

Summer went quite well for me.

I went on vacation but not as long as we wanted because I always go camping for 15 days and this year I have only gone to Malaga for a week.

The truth is that it has been a rest for me without tasks or anything to do.

What has hurt me the most is that in summer I saw my friends every day and this year very little.

# NEW SCHOOL YEAR

This year the school has set many rules which are difficult to meet.

Luckily we only go 3 hours a day so it is not so overwhelming to be that time with the mask.

The downside is that I can't talk to my friends or be with them as a couple at work.

They also send a lot of tasks and in the afternoon I don't have time for almost anything

FINALLY

I believe that we should take more measures because there are many genes that do not comply with them and there are more infections.

The economy is going to decline a lot.

Hopefully they find a vaccine and end this all soon.
