## Security of internet

### **Never share your password to anyone.**

**Keep your passwords safe.  
Use a secure and reliable password manager.**

### **Use a secure VPN connection.**

**A Virtual Private Network (VPN) will ensure your anonymity on the internet.**

### **Be careful of what you post.**

**Remember: what you post on the internet will stay there forever.**

### **Do not talk with strangers**

**do not talk to strangers on the internet, they can access your computer or get personal information from you**

### **camera disabled**

**If you have a camera on your computer, it is advisable to cover it because hackers can activate it and see what you do**

### **Practice safe browsing.**

**A single careless click can expose your sensitive information. Think before you click!**

### **Be careful of what you download.**

**Avoid downloading apps or software that look suspicious. It may result in malware.**

### **stay Anonymous**

**do not give personal data, never show your face and always remain anonymous**

### **do not enter unknown pages**

**if you enter unknown web pages, you can get a virus or a trojan**

### **share location**

**never give permission to share your location**
