1. During your participation in the project, how interesting to you were the following?

The most interesting for me — *Interesting* — *Not interesting*

	Working with Panoramic photos	Having tours in foreign schools and towns	Using ICT tools	Practicing of a foreign language	Collaborating with other schools
The most interesting for me	97	121	79	100	131
Interesting	79	65	97	66	53
Not interesting	13	3	13	23	5

The motivation for our students to work in the project was the collaboration with their peers from abroad and having tours in foreign schools and towns (which is among the core additional values of eTwinning project).
In addition the goals to work and practice on panoramic photos, ICT tools and in foreign language were highly accepted

2. Check the activities in the project that you have participated
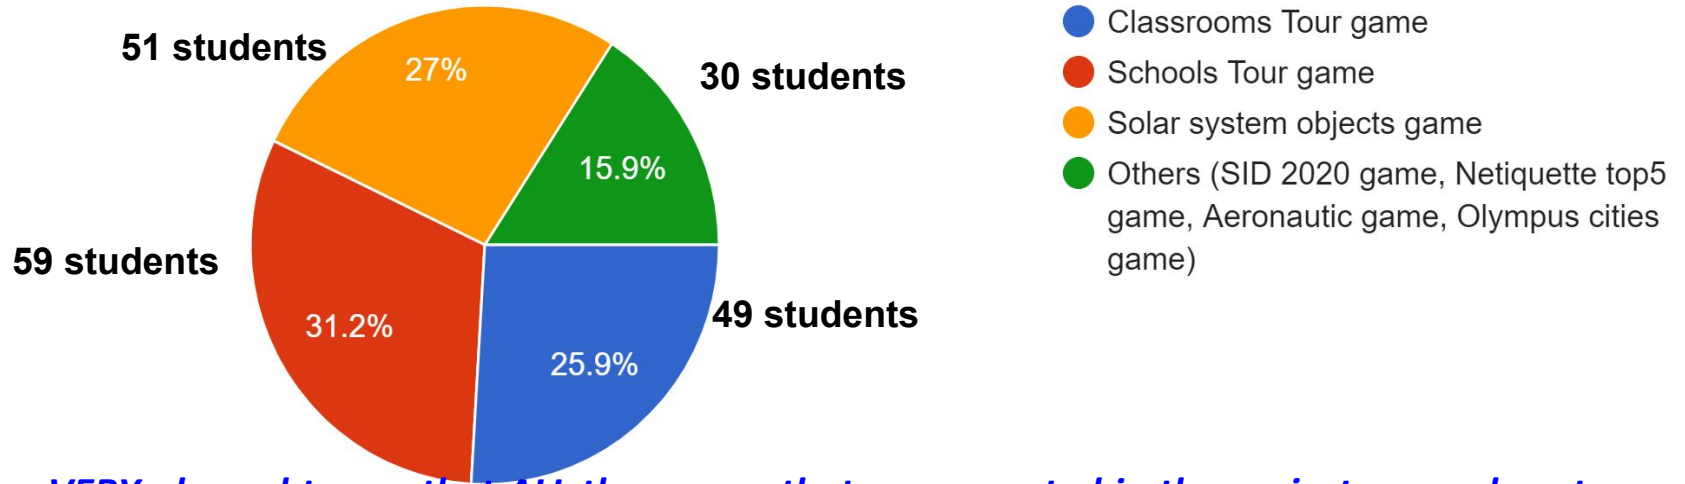

189 responses

Activity	Responses
360 Photos	160 (84.7%)
Presentations with panoramic photos	134 (70.9%)
Maps	72 (38.1%)
Forums	114 (60.3%)
Videoconference	92 (48.7%)
Freestyle activities (posters, stories, comics, coding)	139 (73.5%)
Playing the Games	167 (88.4%)
Polls	72 (38.1%)
Postal exchanges	123 (65.1%)
Other	74 (39.2%)
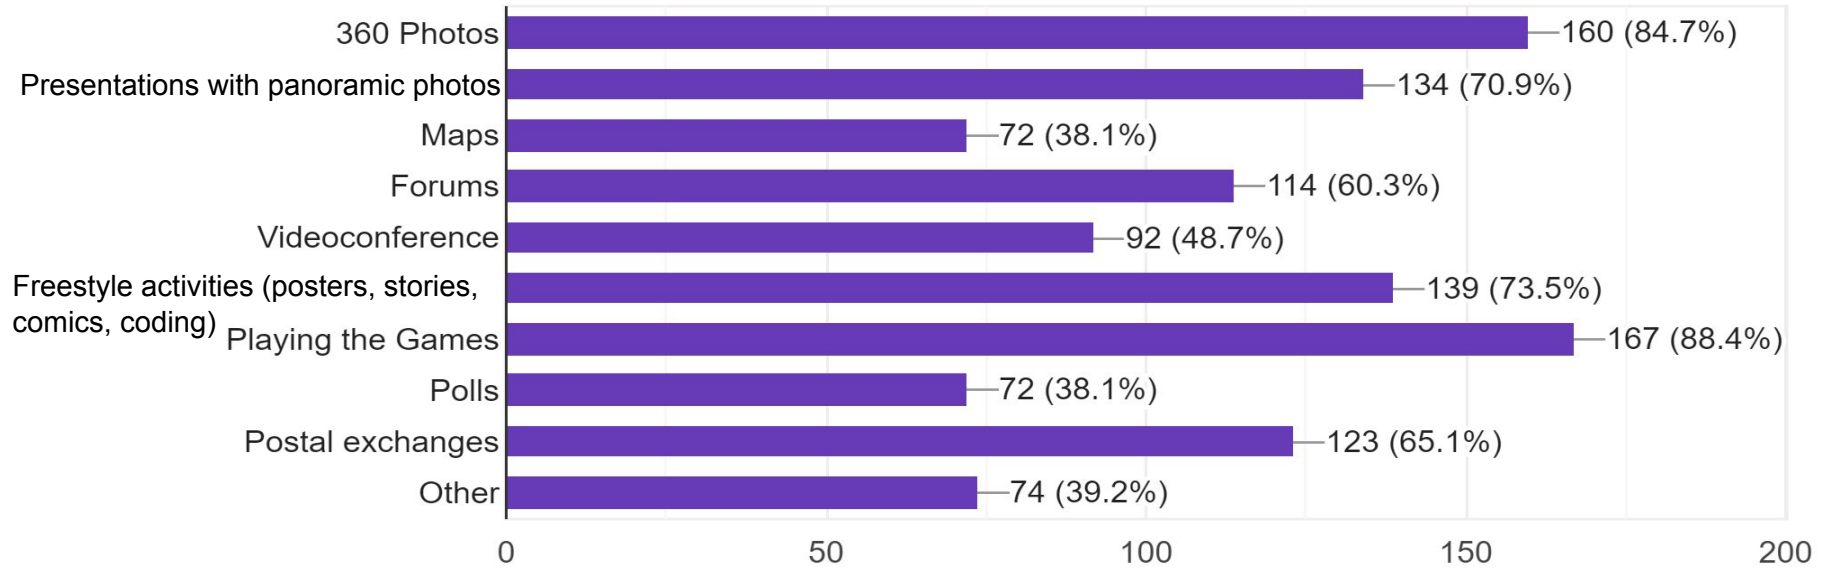

The project's tools to enhance the learning process were a) the 360 (panoramic) Photos (shooting, editing, posting, created in presentations) and b) Games that are collaboratively created by the participated classes in the Forums.
These tools and the scheduled process had been followed with very good participation by the majority of the students.
 In addition, in the project and to help the teachers to embed it even better on their curriculum, there were freestyle activities associated with the project's philosophy. In these freestyle activities there was also a very good participation that proves that were actually implemented collaboratively by many partners in the project and it was not only an initiative of one or a few classes. Communication activities (Forums, Polls. Postal Exchanges, Video conferance) had been followed by the majority of our students

## 3. Which of the games of the project was your favorite?

189 responses

51 students 27%

30 students 15.9%

59 students 31.2%

49 students 25.9%

- 🔵 Classrooms Tour game
- 🔴 Schools Tour game
- 🟠 Solar system objects game
- 🟢 Others (SID 2020 game, Netiquette top5 game, Aeronautic game, Olympus cities game)

We are VERY pleased to see that ALL the games that were created in the project were almost equally enjoyed by our students. There is a slight preference to the Schools Tour Game which is of great importance for us (teachers) as this game (and the solar system game and the final cities game) were played by the students at home alone or in online lessons during the schools' lockdown because of the COVID19. The Schools Tour Game is also the most demanding as it really offers a rather full tour to our partners' schools and this is a feature that students had appreciated in Q1 of this form, as a very motivational factor of their participation in the project

Students agree that this project was useful for them (a "final feedback" for enhancing skills and learning)
