

Photos that do not have a 2:1 ratio are distorted on panoraven and are not accepted on thinglink.

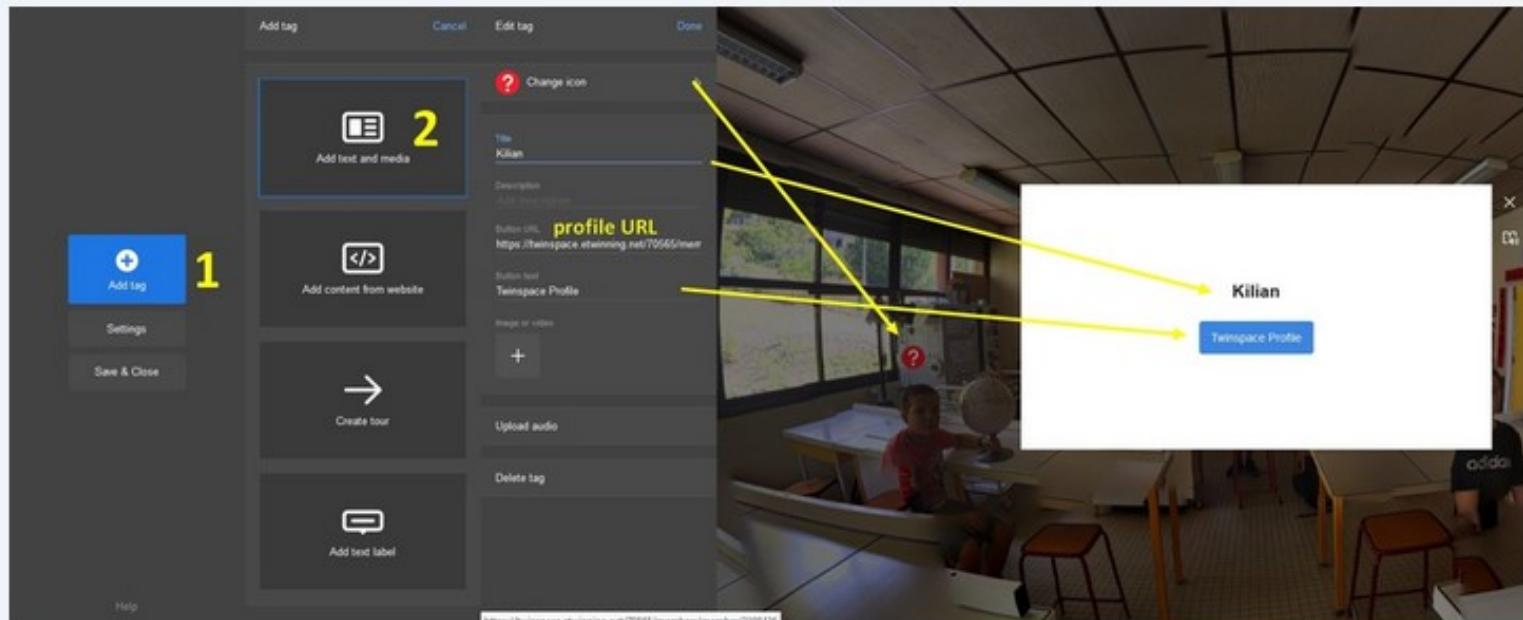

Les photos qui n'ont pas un rapport 2:1 sont déformées sur panoraven et ne sont pas acceptées sur thinglink.

Resize an image with a 2:1 ratio / Redimensionner une image au rapport 2:1

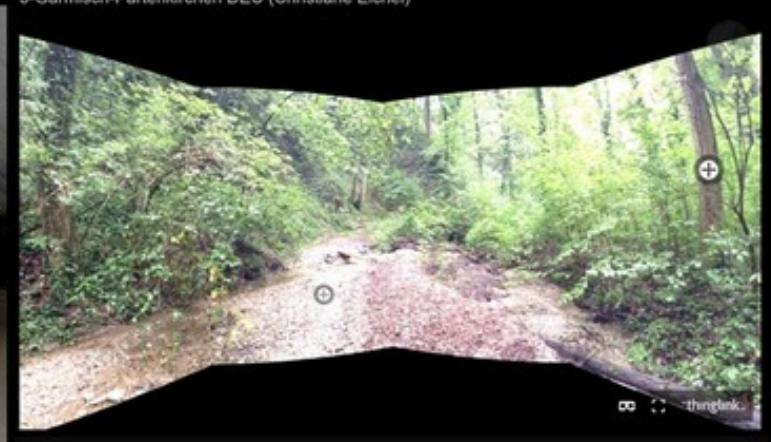

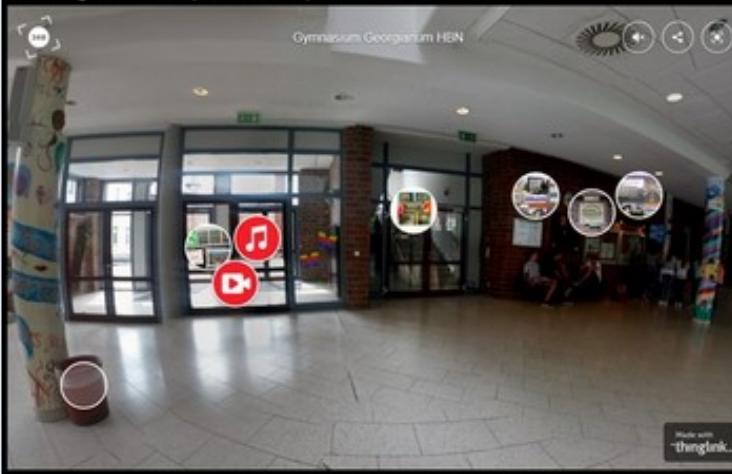

Thinglink

The screenshot shows the Thinglink 'CREATE' interface. On the left, there are three categories: 'Editorial & Marketing', 'Classroom Learning', and 'E-learning & Corporate training'. Each category has a 'SELECT' button. A red arrow points to the 'CREATE ACCOUNT' button at the top left. Another red arrow points to the 'Upload 360°/VR Image' option in the dropdown menu. The main area shows a 3D wireframe model of a room with various interactive elements like stars, question marks, and location pins.

Interactive 360 by Andrea (2-Hildburghausen DEU) and Christiane (5-Garmisch-Partenkirchen DEU) on [360best.weebly](#)

Excellent view with Thinglink!! Thanks for the explanation, Eric!

And thanks so much, Eric, for showing those interactive 360 photos.

We'll do this task when our lessons start by mid September.
