

Eurovix

Eurovix is 25 years old company in Slovenska Bistrica, that is specialized for researches, in the area of biotechnology for management with natural risks. They have biological stimulators that manage water resources. The Base of this company is bio technology for life. They don't use synthetic chemical materials or genetically changed organisms. Basically what they do is upgrading natural biological processes. They work in 4 different fields: zoo, aqua, agro and enviro. Zoo is all about livestock reproduction, they approve health of animals and they deal with organic materials. Aqua supports biological water resources. Their main job is to save water, preserve quality of water and they are trying not to pollute environment. Agro is about farming. They are trying to improve immunity of plants, environmentally friendly farming and better productivity. Enviro is supporting environment. They are versatile and economic.
