Local work structure profile

Žiga Kovačič

ALUMINIUM FOIL

Aluminum foil is one of the most important and most widely used cold-rolled product made of aluminum and aluminum alloys. It is most commonly used in consumer products. Durability, low price and unique combination of features are additional arguments that speak in favor of the benefits of aluminum foil for a wide variety of applications. Moreover, aluminum foil is environmentally friendly as it can be recycled and reused.

Products:

Aluminium sticks, aluminium profiles, aluminium pipes, aluminium sheet metals, aluminium alloys and aluminium foil that Impol is the best known for.

JOB 1 - SALES MAN

Job oportunities

Job 1 - Salesman (page 4)
