

# ERASMUS + PROJECT “CREATING A LEARNING LOVE” SEMINAR IN ESTONIA

## SPAIN: SUMMARY OF THE PROJECT AND MEETING

Our project was the initiative of our partner from Turkey. The project was created on Etwinning. Spain assumed coordination for logistical reasons.

Initially we were 6 partners: Turkey, Estonia, Macedonia, Bulgaria, Slovenia and Spain.

The Logo was created at the proposal of our Turkish partner and with the approval of all the participants.

The name given to the project reflects the relationship between all the participants.

The expected results at the end of our work would be the following:

- Improving positive attitude to the educators
- Expressing her/himself through games
- Improving creativity and problem solving through
- Gaining information about European culture
- Gaining basic information about partners countries

For this, we had great things in our favor: effort, illusion, students, teachers, our educational systems, etc., but above all, the great love that has united us during all this time and that has made us continue forward to despite the circumstances.

Two major events marked the development of our project: firstly, the abandonment of our partner from Slovenia and, secondly, the arrival of the Pandemic.

With all this, with our effort and our motivation, we were saving the circumstances. Our online meetings made it easier for us to reach important agreements such as: expanding the project and distributing our initial tasks. Spain was a partner especially punished by the pandemic.

Thus, we readjust the meetings that we initially planned, always at the expense of what is established at each moment by the health authorities of each country.
